Subject index*

The index to the abstracts of the scientific sessions of the 2009 annual meeting of the American Academy of Allergy, Asthma and Immunology is located in the February issue, part 2.

A

Abstracts
- Late-breaking abstracts presented at scientific sessions. American Academy of Allergy, Asthma and Immunology 2009 annual meeting, March 13-17, 2009. 2009;123:724-32
- Peanut allergy is associated with increased asthma prevalence in food allergic children (Gaffin) (2009;123:S110). 2009;123:1195 (Correction)
- Program and abstracts of papers to be presented during scientific sessions. American Academy of Allergy, Asthma and Immunology 2009 annual meeting, March 1-6, 2002. 2009;123:S1-S359

ACCESS project
- Relationships among prenatal aeroallergen exposure and maternal and cord blood IgE: project ACCESS (Peters et al). 2009;123:1041-6

Accidental ingestion
- Accidental allergic reactions in children allergic to cow's milk proteins (Boyano-Martínez et al). 2009;123:883-8

Acetaminophen
- Lung function test results in normal infantsa COPSAC sequel (Yemen and Gaston). 2009;123:658-9 (Editorial)

Adenosine
- $CD4^+CD25^+$ regulatory T cells suppress contact hypersensitivity reactions through a CD39, adenosine-dependent mechanism (Ring et al). 2009;123:1287-96
- Regulatory T cells turn the table on T_H2 response (Rothenberg and Nelson). 2009;123:1198 (News beyond our pages)

Adrenergic beta-agonists; *see also specific beta-agonists*
- Cardiovascular disease risk associated with asthma and respiratory morbidity might be mediated by short-acting β_2-agonists (Appleton et al). 2009;123:124-30
- High-dose inhaled corticosteroids versus add-on long-acting β-agonists in asthma: an observational study (Thomas et al). 2009;123:116-21
- Step-up therapy in uncontrolled asthma: choices and outcomes (Sears). 2009;123:122-3 (Editorial)
- US Food and Drug Administration (FDA) Advisory Committees vote against asthma indication for Serevent and Foradil (Rothenberg and Nelson). 2009;123:277 (News beyond our pages)

Adverse drug reactions; *see* Drug hypersensitivity

African Americans
- Body mass index and asthma incidence in the Black Women's Health Study (Coogan et al). 2009;123:89-95
- Improving asthma self-efficacy: developing and testing a pilot community-based asthma intervention for African American adults (Martin et al). 2009;123:153-9
- The effect of obesity on asthma incidence: moving past the epidemiologic evidence (Clerisme-Beaty and Rand). 2009;123:96-7 (Editorial)

Agammaglobulinemia
- Clinical and genetic diagnosis of warts, hypogammaglobulinemia, infections, and myelokathexis syndrome in 10 patients (Tassone et al). 2009;123:1170-3 (Letter to the editor)

Air pollution
- Exposure to trafficlung function and health status in adults with asthma (Balmes et al). 2009;123:626-31
- Increased asthma and respiratory symptoms in children exposed to petrochemical pollution (Wichmann et al). 2009;123:632-8

Airway hyperresponsiveness
- Allergic airway hyperresponsiveness, inflammation, and remodeling do not develop in phosphoinositide 3-kinase γ–deficient mice (Takeda et al). 2009;123:805-12
- Mechanisms of occupational asthma (Maestrelli et al). 2009;123:531-42
- Mitogen-activated protein kinase/extracellular signal-regulated kinase 1/2–dependent pathways are essential for $CD8^+$ T cell–mediated airway hyperresponsiveness and inflammation (Ohnishi et al). 2009;123:249-58
- Natural killer T (NKT) cells respond to IL-25 to cause airway hyperreactivity (Rothenberg and Nelson). 2009;123:278 (News beyond our pages)
- PI3Kγ as a new therapeutic target for asthma (Leung and Szefler). 2009;123:773 (The editors' choice)
- Restoration of T-box–containing protein expressed in T cells protects against allergen-induced asthma (Park et al). 2009;123:479-85
- Toll-like receptor 4 variants reduce airway response at high endotoxin levels (Leung and Szefler). 2009;123:1024 (The editors' choice)
- Toll-like receptor 4 variants reduce airway response in human subjects at high endotoxin levels in a swine facility (Senthilselvan et al). 2009;123:1034-40
- Virus-specific IgE enhances airway responsiveness on reinfection with respiratory syncytial virus in newborn mice (Dakhama et al). 2009;123:138-45

*January, pp. 1-276; February, part 1, pp. 277-516; part 2, pp. S1-S364; March, pp. 517-732; April, pp. 733-974; May, pp. 975-1196; June, part 1, pp. 1197-1480; part 2, pp. S365-S383.

Airway inflammation
Airway inflammation in patients with asthma with high-fixed or low-fixed plus as-needed budesonide/formoterol (Pavord et al). 2009;123: 1083-9
$CD34^+$ hemopoietic progenitor cells are potent effectors of allergic inflammation (Allakhverdi et al). 2009;123:472-8
Fms-like tyrosine kinase 3 ligand increases a lung DC subset with regulatory properties in allergic airway inflammation (Shao et al). 2009;123:917-24
The acute effect of swimming on airway inflammation in adolescent elite swimmers (Pedersen et al). 2009;123:502-4 (Letter to the editor)
Airway remodeling
Airway wall structural remodeling from endobronchial biopsies: What does it really mean? (Bourdin et al). 2009;123:711-2 (Correspondence)
Airway wall structural remodeling from endobronchial biopsies: What does it really mean? (Siddiqui and Brightling). 2009;123:712 (Letter reply)
The outer wall of small airways is a major site of remodeling in fatal asthma (Dolhnikoff et al). 2009;123:1090-7
Allergen challenge
Component-resolved *in vitro* diagnosis of hazelnut allergy in Europe (Hansen et al). 2009;123: 1134-41
Is the prevalence of peanut allergy increasing? 5-year follow-up study in children in Montreal (Ben-Shoshan et al). 2009;123:783-8
Local release of B cell–activating factor of the TNF family after segmental allergen challenge of allergic subjects (Kato et al). 2009;123:369-75
Rational approach to aspirin dosing during oral challenges and desensitization of patients with aspirin-exacerbated respiratory disease (Hope et al). 2009;123:406-10
Repeated segmental allergen provocation: reassessment of provocation dose (Nassenstein and Müller-Quernheim). 2009;123:270 (Correspondence)
Repeated segmental allergen provocation: reassessment of provocation dose (Julius and Virchow). 2009;123:270-1 (Letter reply)
Work Group reportoral food challenge testing (Nowak-Wegrzyn et al). 2009;123:S361-S378
Allergenicity; *see* Sensitization
Allergens
Agents causing occupational asthma (Malo and Chan-Yeung). 2009;123:545-50 (Current perspectives)
Determinants of allergenicity (Traidl-Hoffmann et al). 2009;123:558-66 (Current perspectives)
Mediator release assay for assessment of biological potency of German cockroach allergen extracts (Nowak-Wegrzyn et al). 2009;123:949-55
Molecular cloning, expression, and characterization of a major 38-kd cochlineal allergen (Ohgiya et al). 2009;123:1157-62
Monitoring bacteriostasis in allergen extract mixing: 10 years of culture data (Letz et al). 2009;123: 1175-6 (Letter to the editor)
Streamlining immunotherapy (Rothenberg and Nelson). 2009;123:1 (News beyond our pages)
The perfectly potent peanut (Shreffler). 2009;123: 352-3 (Editorial)
Allergic shiners
Quantitative assessment of allergic shiners in children with allergic rhinitis (Chen et al). 2009;123:665-71
Allergies; *see also* Food hypersensitivity; *specific allergens*
A BAFF affirmation (Leung and Szefler). 2009;123: 334 (The editors' choice)
Accidental allergic reactions in children allergic to cow's milk proteins (Boyano-Martínez et al). 2009;123:883-8
Adiposity, serum lipid levels, and allergic sensitization in Chinese men and women (Ouyang et al). 2009;123:940-8
Advances in mechanisms of asthma, allergy, and immunology in 2008 (Boyce et al). 2009;123: 569-74
Allergen-enhanced thrombomodulin (blood dendritic cell antigen 3, CD141) expression on dendritic cells is associated with a T_H2-skewed immune response (Yerkovich et al). 2009;123:209-16
Association of obesity with IgE levels and allergy symptoms in children and adolescentsresults from the National Health and Nutrition Examination Survey 2005-2006 (Visness et al). 2009;123: 1163-9
Current use of room disinfectants and allergic symptoms at the age of 4 years (Krauss-Etschmann et al). 2009;123:1176-9 (Letter to the editor)
Disparities in allergic disease: hypersensitivity and social disorders (Cohen). 2009;123:1422-4 (The allergy archives)
Efficacy and mechanisms of action of traditional Chinese medicines for treating asthma and allergy (Li and Brown). 2009;123:297-306
Exotic pet allergy (Phillips and Lockey). 2009;123: 513-5 (Clinical pearls)
Farm exposure—a novel natural model of immunotherapy against allergic diseases? (Leung and Szefler). 2009;123:772 (The editors' choice)
Higher folate levels might protect against allergies and asthma (Leung and Szefler). 2009;123:1242 (The editors' choice)
Is structured allergy history sufficient when assessing patients with asthma and rhinitis in general practice? (Smith et al). 2009;123:646-50
Less allergy at age 5 years in cesarean-born children receiving probiotics (Leung and Szefler). 2009;123:333 (The editors' choice)

Local release of B cell–activating factor of the TNF family after segmental allergen challenge of allergic subjects (Kato et al). 2009;123:369-75
Maternal farm exposure modulates neonatal immune mechanisms through regulatory T cells (Schaub et al). 2009;123:774-82
Mechanisms and treatment of allergic disease in the big picture of regulatory T cells (Akdis and Akdis). 2009;123:735-46
Mitogen-activated protein kinase/extracellular signal-regulated kinase 1/2–dependent pathways are essential for $CD8^+$ T cell–mediated airway hyperresponsiveness and inflammation (Ohnishi et al). 2009;123:249-58
No increase in the prevalence of peanut allergy (Leung and Szefler). 2009;123:772 (The editors' choice)
Prenatal probiotic administration can influence *Bifidobacterium* microbiota development in infants at high risk of allergy (Lahtinen et al). 2009;123:499-501 (Letter to the editor)
Probiotics prevent IgE-associated allergy until age 5 years in cesarean-delivered children but not in the total cohort (Kuitunen et al). 2009;123:335-41
Prostatic kallikrein: a new major dog allergen (Mattsson et al). 2009;123:362-8
Prostatic kallikrein—a new major dog allergen (Leung and Szefler). 2009;123:333 (The editors' choice)
Therapeutic approaches to allergy and autoimmunity based on the $FoxP3^+$ regulatory T-cell activation and expansion (Miyara et al). 2009;123:749-55
Update on allergies in pregnancy, lactation, and early childhood (Pali-Schöll et al). 2009;123:1012-21 (Current perspectives)

Allergy and immunology (specialty)
Advances in basic and clinical immunology in 2008 (Chinen and Shearer). 2009;123:328-32
Jack Pepys (May 15, 1914–September 9, 1996)a personal recollection (Pepys). 2009;123:718-20 (The allergy archives)
Jack Pepys' contributions to the medical literature (Nelson). 2009;123:720-3 (The allergy archives)

Alprazolam
Successful treatment of chronic drug-resistant urticaria with alprazolam (Dueñas-Laita et al). 2009;123:504-5 (Letter to the editor)

Alternative medicine; *see* Complementary therapies

American Academy of Allergy, Asthma and Immunology (AAAAI); *see also* Abstracts
A special thank you to our reviewers. 2009;123:279-82
Complementary and alternative medicine education: need for expanded educational resources for American Academy of Allergy, Asthma & Immunology members (Enger et al). 2009;123:511-2 (Correspondence)
Eliminating health disparitiesWhat have we done, and what do we do next? (Apter and Casillas). 2009;123:1237-9 (Editorial)

Anaphylaxis
Advances in allergic skin disease, anaphylaxis, and hypersensitivity reactions to foods, drugs, and insects in 2008 (Sicherer and Leung). 2009;123:319-27
Anaphylaxis fatalities and admissions in Australia (Liew et al). 2009;123:434-42
Anaphylaxis in Olmsted County: seasonal pattern and suggestions for epidemiologic analysis (Mulla and Simon). 2009;123:1194 (Correspondence)
Anaphylaxis in Olmsted County: seasonal pattern and suggestions for epidemiologic analysis (Decker et al). 2009;123:1194-5 (Letter reply)
Anaphylaxis provoked by ingestion of marshmallows containing fish gelatin (Kuehn et al). 2009;123:708-9 (Letter to the editor)
Assessing anaphylactic risk? Consider mast cell clonality (Metcalfe and Schwartz). 2009;123:687-8 (Editorial)
Automatic epinephrine device use in children with food allergies (Arkwright). 2009;123:267-8 (Correspondence)
Automatic epinephrine device use in children with food allergies (Järvinen et al). 2009;123:268 (Letter reply)
Characteristics of childhood peanut allergy in the Australian Capital Territory, 1995 to 2007 (Mullins et al). 2009;123:689-93
Clonal mast cell disorders in patients with systemic reactions to *Hymenoptera* stings and increased serum tryptase levels (Bonadonna et al). 2009;123:680-6
Delayed anaphylaxis, angioedema, or urticaria after consumption of red meat in patients with IgE antibodies specific for galactose-α-1,3-galactose (Commins et al). 2009;123:426-33
Endothelial G protein required in systemic anaphylaxis (Rothenberg and Nelson). 2009;123:734 (News beyond our pages)
Food Allergy Herbal Formula-2 silences peanut-induced anaphylaxis for a prolonged posttreatment period via IFN-γ–producing $CD8^+$ T cells (Srivastava et al). 2009;123:443-51
Incidence and characteristics of biphasic reactions after allergen immunotherapy (Scranton et al). 2009;123:493-8
Peanuts can contribute to anaphylactic shock by activating complement (Khodoun et al). 2009;123:342-51
Soybean *(Glycine max)* allergy in Europe: Gly m 5 (β-conglycinin) and Gly m 6 (glycinin) are potential diagnostic markers for severe allergic reactions to soy (Holzhauser et al). 2009;123:452-8
Targeting cytokines in experimental food allergy (Leung and Szefler). 2009;123:41 (The editors' choice)
Targeting IL-4/IL-13 signaling to alleviate oral allergen–induced diarrhea (Brandt et al). 2009;123:53-8

Angioedema
Advances in allergic skin disease: omalizumab is a promising therapy for urticaria and angioedema (Spector and Tan). 2009;123:273-4 (Correspondence)
Advances in basic and clinical immunology in 2008 (Chinen and Shearer). 2009;123:328-32
Angioedema and estrogen-dependent angioedema with activation of the contact system (Hentges et al). 2009;123:262-4 (Letter to the editor)
Genetic analysis of Factor XII and bradykinin catabolic enzymes in a family with estrogen-dependent inherited angioedema (Duan et al). 2009;123:906-10
What the first 10,000 patients with chronic urticaria have taught mea personal journey (Kaplan). 2009;123:713-6 (Clinical pearls)
Angiogenesis
Vascular endothelial growth factors synthesized by human lung mast cells exert angiogenic effects (Detoraki et al). 2009;123:1142-9
Animals, domestic
Exotic pet allergy (Phillips and Lockey). 2009;123:513-5 (Clinical pearls)
Prostatic kallikrein: a new major dog allergen (Mattsson et al). 2009;123:362-8
Prostatic kallikrein—a new major dog allergen (Leung and Szefler). 2009;123:333 (The editors' choice)
Risk of early childhood eczema (Bisgaard et al). 2009;123:1355-60
The carbohydrate galactose-α-1,3-galactose is a major IgE-binding epitope on cat IgA (Grönlund et al). 2009;123:1189-91 (Letter to the editor)
Antifungal agents
Antifungal therapy in severe asthma (Rothenberg and Nelson). 2009;123:517 (News beyond our pages)
Antigen presentation
Mast cells as antigen-presenting cells (Leung and Szefler). 2009;123:42 (The editors' choice)
Notch signaling confers antigen-presenting cell functions on mast cells (Nakano et al). 2009;123:74-81
Antihistamines; *see also specific medications*
High-dose desloratadine decreases wheal volume and improves cold provocation thresholds compared with standard-dose treatment in patients with acquired cold urticariaa randomized, placebo-controlled, crossover study (Siebenhaar et al). 2009;123:672-9
Apoptosis
IL-5–mediated eosinophil survival requires Pim-1 but not PI3K (Leung and Szefler). 2009;123:580 (The editors' choice)
Proviral integration site for Moloney murine leukemia virus 1, but not phosphatidylinositol-3 kinase, is essential in the antiapoptotic signaling cascade initiated by IL-5 in eosinophils (Andina et al). 2009;123:603-11
Arginase
Arginase I and II variants and asthma occurrence: differential modifying effects of atopy and ozone (Leung and Szefler). 2009;123:579 (The editors' choice)
Roles of arginase variants, atopy, and ozone in childhood asthma (Salam et al). 2009;123:596-602
Asparaginase
Alternative algorithm for L-asparaginase allergy in children with acute lymphoblastic leukemia (Soyer et al). 2009;123:895-9
Aspirin
Clinical course and urinary eicosanoids in patients with aspirin-induced urticaria followed up for 4 years (Setkowicz et al). 2009;123:174-8
Rational approach to aspirin dosing during oral challenges and desensitization of patients with aspirin-exacerbated respiratory disease (Hope et al). 2009;123:406-10
Asthma
Advances in adult asthma diagnosis and treatment and health outcomes, education, delivery, and quality in 2008 (Apter). 2009;123:35-40
Advances in mechanisms of asthma, allergy, and immunology in 2008 (Boyce et al). 2009;123:569-74
Airway smooth muscle hyperplasia in asthma—a consequence of fibrocyte recruitment? (Leung and Szefler). 2009;123:334 (The editors' choice)
Airway wall structural remodeling from endobronchial biopsies: What does it really mean? (Bourdin et al). 2009;123:711-2 (Correspondence)
Airway wall structural remodeling from endobronchial biopsies: What does it really mean? (Siddiqui and Brightling). 2009;123:712 (Letter reply)
Allergic airway hyperresponsiveness, inflammation, and remodeling do not develop in phosphoinositide 3-kinase γ–deficient mice (Takeda et al). 2009;123:805-12
Anti-IgE therapy: clinical utility beyond asthma (Casale and Stokes). 2009;123:770-1
Antifungal therapy in severe asthma (Rothenberg and Nelson). 2009;123:517 (News beyond our pages)
Anti–IL-2 receptor monoclonal antibody prolongs time to severe asthma exacerbations (Rothenberg and Nelson). 2009;123:1-2 (News beyond our pages)
Asthma and obesity: an archival addendum (Cohen). 2009;123:265-6 (Correspondence)
Asthma and obesity: an archival addendum (Gold and Litonjua). 2009;123:266 (Letter reply)
Asthma symptom re-emergence after omalizumab withdrawal correlates well with increasing IgE and decreasing pharmacokinetic concentrations (Slavin et al). 2009;123:107-13
Body mass index, weight gain, and other determinants of lung function decline in adult asthma (Marcon et al). 2009;123:1069-74

Body mass index and asthma incidence in the Black Women's Health Study (Coogan et al). 2009;123: 89-95

Body mass index and phenotype in subjects with mild-to-moderate persistent asthma (Sutherland et al). 2009;123:1328-34

Cardiovascular disease risk associated with asthma and respiratory morbidity might be mediated by short-acting β_2-agonists (Appleton et al). 2009;123:124-30

CCR4 leads the way for T_H2 cell homing into the allergic lung (Leung and Szefler). 2009;123:42 (The editors' choice)

Climate change and plant food allergens (Beggs). 2009;123:271 (Correspondence)

Climate change and plant food allergens (Shea et al). 2009;123:272 (Letter reply)

Combined sensitization of mice to extracts of dust mite, ragweed, and *Aspergillus* species breaks through tolerance and establishes chronic features of asthma (Goplen et al). 2009;123:925-32

Contribution of CCR4 and CCR8 to antigen-specific T_H2 cell trafficking in allergic pulmonary inflammation (Mikhak et al). 2009;123:67-73

Deciphering gene-environment interactions through mouse models of allergic asthma (Willis-Owen and Valdar). 2009;123:14-23

Der p 1 suppresses indoleamine 2, 3-dioxygenase in dendritic cells from house dust mite–sensitive patients with asthma (Maneechotesuwan et al). 2009;123:239-48

Diet and asthma in French women (Rothenberg and Nelson). 2009;123:733 (News beyond our pages)

Does the T_H1/ T_H2 paradigm fit for human T cells? (Leung and Szefler). 2009;123:773 (The editors' choice)

Efficacy and mechanisms of action of traditional Chinese medicines for treating asthma and allergy (Li and Brown). 2009;123:297-306

Epithelial cells required for asthma response (Rothenberg and Nelson). 2009;123:1197 (News beyond our pages)

Exposure to traffic: lung function and health status in adults with asthma (Balmes et al). 2009;123: 626-31

Fibrocyte localization to the airway smooth muscle is a feature of asthma (Saunders et al). 2009;123: 376-84

Fms-like tyrosine kinase 3 ligand increases a lung DC subset with regulatory properties in allergic airway inflammation (Shao et al). 2009;123:917-24

Functional gene variants in T_H1 transcription factors influence asthma risk (Leung and Szefler). 2009;123:1025 (The editors' choice)

Gene-environment interactions: the road less traveled by in asthma genetics (Vercelli). 2009;123:26-7 (Editorial)

Gene-environment interactions in asthma (von Mutius). 2009;123:3-11

Greater *in vitro* susceptibility to rhinovirus infection of bronchial than nasal airway epithelial cells from human subjects (Lopez-Souza et al). 2009;123: 1384-90

Has mandatory folic acid supplementation of foods increased the risk of asthma and allergic disease? (Ownby). 2009;123:1260-1 (Editorial)

High-dose inhaled corticosteroids versus add-on long-acting β-agonists in asthma: an observational study (Thomas et al). 2009;123:116-21

Higher folate levels might protect against allergies and asthma (Leung and Szefler). 2009;123:1242 (The editors' choice)

How well are US emergency departments taking care of asthmatic patients? (Leung and Szefler). 2009;123:333 (The editors' choice)

IL-17–producing T cells in lung immunity and inflammation (Nembrini and Kopf). 2009;123: 986-94

Impaired translation of CCAAT/enhancer binding protein α mRNA in bronchial smooth muscle cells of asthmatic patients (Borger et al). 2009;123: 639-45

Improving asthma self-efficacy: developing and testing a pilot community-based asthma intervention for African American adults (Martin et al). 2009;123:153-9

In asthma, the apple falls faster than the pear (Tantisira). 2009;123:1075-6 (Editorial)

Individualized asthma self-management improves medication adherence and markers of asthma control (Janson et al). 2009;123:840-6

Is structured allergy history sufficient when assessing patients with asthma and rhinitis in general practice? (Smith et al). 2009;123:646-50

Multiallergen immunotherapy for allergic rhinitis and asthma (Nelson). 2009;123:763-9 (Rostrum)

Natural killer T cells in the lungs of patients with asthma (Matangkasombut et al). 2009;123:1181-5 (Letter to the editor)

Nitric oxide inhibits human rhinovirus-induced transcriptional activation of CXCL10 in airway epithelial cells (Koetzler et al). 2009;123:201-8

Oral contraception, body mass index, and asthma: a cross-sectional Nordic-Baltic population survey (Macsali et al). 2009;123:391-7

PI3Kγ as a new therapeutic target for asthma (Leung and Szefler). 2009;123:773 (The editors' choice)

Quality of care for acute asthma in 63 US emergency departments (Tsai et al). 2009;123:354-61

Rational approach to aspirin dosing during oral challenges and desensitization of patients with aspirin-exacerbated respiratory disease (Hope et al). 2009;123:406-10

Redefining the role of eosinophils in asthma (Rothenberg and Nelson). 2009;123:975-6 (News beyond our pages)

Repeated segmental allergen provocation: reassessment of provocation dose (Nassenstein and

Müller-Quernheim). 2009;123:270 (Correspondence)
Repeated segmental allergen provocation: reassessment of provocation dose (Julius and Virchow). 2009;123:270-1 (Letter reply)
Restoration of T-box–containing protein expressed in T cells protects against allergen-induced asthma (Park et al). 2009;123:479-85
Rural health disparities in asthma care and outcomes (Valet et al). 2009;123:1220-5 (Current perspectives)
Selective deregulation in chemokine signaling pathways of $CD4^+CD25^{hi}CD127^{lo/-}$ regulatory T cells in human allergic asthma (Nguyen et al). 2009;123:933-9
Step-up therapy in uncontrolled asthma: choices and outcomes (Sears). 2009;123:122-3 (Editorial)
TBX21 gene variants increase childhood asthma risk in combination with *HLX1* variants (Suttner et al). 2009;123:1062-8
T_H17-associated cytokines (IL-17A and IL-17F) in severe asthma (Al-Ramli et al). 2009;123:1185-7 (Letter to the editor)
The effect of obesity on asthma incidence: moving past the epidemiologic evidence (Clerisme-Beaty and Rand). 2009;123:96-7 (Editorial)
The effect of sex on asthma control from the National Asthma Survey (Temprano and Mannino). 2009;123:854-60
The glucocorticoid receptor heterocomplex gene *STIP1* is associated with improved lung function in asthmatic subjects treated with inhaled corticosteroids (Hawkins et al). 2009;123:1376-83
The outer wall of small airways is a major site of remodeling in fatal asthma (Dolhnikoff et al). 2009;123:1090-7
Thrombomodulin: a novel player in allergic asthma (Bratke et al). 2009;123:1192 (Correspondence)
Thrombomodulin: a novel player in allergic asthma (Yerkovich and Upham). 2009;123:1192-3 (Letter reply)
Treatment of silent reflux does not improve poorly controlled asthma (Rothenberg and Nelson). 2009;123:1197-8 (News beyond our pages)
Trial of TNF-α blockade fails in patients with severe asthma (Rothenberg and Nelson). 2009;123:1198 (News beyond our pages)
Unique and overlapping gene expression patterns driven by IL-4 and IL-13 in the mouse lung (Lewis et al). 2009;123:795-804
US Food and Drug Administration (FDA) Advisory Committees vote against asthma indication for Serevent and Foradil (Rothenberg and Nelson). 2009;123:277 (News beyond our pages)

Asthma, occupational

Agents causing occupational asthma (Malo and Chan-Yeung). 2009;123:545-50 (Current perspectives)
Current perspectives in occupational asthma (Bush). 2009;123:567-8 (Editorial)
Management of work-related asthma (Smith and Bernstein). 2009;123:551-7 (Current perspectives)
Mechanisms of occupational asthma (Maestrelli et al). 2009;123:531-42
Occupational asthma: current concepts in pathogenesis, diagnosis, and management (Dykewicz). 2009;123:519-28

Asthma, pediatric

A novel group of rhinoviruses is associated with asthma hospitalizations (Miller et al). 2009;123:98-104
Addressing asthma health disparities: a multilevel challenge (Canino et al). 2009;123:1209-17
Adolescents and asthma: Why bother with our meds? (Naimi et al). 2009;123:1335-41
Advances in pediatric asthma in 2008: Where do we go now? (Szefler). 2009;123:28-34
Airway glutathione homeostasis is altered in children with severe asthma: evidence for oxidant stress (Fitzpatrick et al). 2009;123:146-52
An interaction between filaggrin mutations and early food sensitization improves the prediction of childhood asthma (Marenholz et al). 2009;123:911-6
Arginase I and II variants and asthma occurrencedifferential modifying effects of atopy and ozone (Leung and Szefler). 2009;123:579 (The editors' choice)
Asthma disparities in urban environments (Bryant-Stephens). 2009;123:1199-1206
Comparison of anthropometric measures of obesity in childhood allergic asthma: Central obesity is most relevant (Musaad et al). 2009;123:1321-7
Dyspnea in overweight childrenIs it asthma? (Schwartzstein and Gold). 2009;123:1319-20 (Editorial)
Evidence that viral infections in infancy cause childhood asthma (Rothenberg and Nelson). 2009;123:278 (News beyond our pages)
Exhaled nitric oxide (eNO) and management of childhood asthma (Rothenberg and Nelson). 2009;123:975 (News beyond our pages)
Genetic variants in the *GATA3* gene are not associated with asthma and atopic diseases in German children (Suttner et al). 2009;123:1179-81 (Letter to the editor)
HLX1 gene variants influence the development of childhood asthma (Leung and Szefler). 2009;123:42 (The editors' choice)
HLX1 gene variants influence the development of childhood asthma (Suttner et al). 2009;123:82-8
Impulse oscillometry versus spirometry in a long-term study of controller therapy for pediatric asthma (Larsen et al). 2009;123:861-7
Increased asthma and respiratory symptoms in children exposed to petrochemical pollution (Wichmann et al). 2009;123:632-8

Infant bronchiolitis severity correlates with childhood asthma risk and severity (Leung and Szefler). 2009;123:1025 (The editors' choice)
Intrauterine bacterial growth at birth and risk of asthma and allergic sensitization among offspring at the age of 15 to 17 years (Keski-Nisula et al). 2009;123:1305-11
Learning from molecular sleuths (Gern and Busse). 2009;123:105-6 (Editorial)
Mothers' anxiety during pregnancy is associated with asthma in their children (Cookson et al). 2009;123:847-53
Overweight and changes in weight status during childhood in relation to asthma symptoms at 8 years of age (Scholtens et al). 2009;123:1312-8
Parental support and cytokine activity in childhood asthmathe role of glucocorticoid sensitivity (Miller et al). 2009;123:824-30
Patient characteristics associated with improved outcomes with use of an inhaled corticosteroid in preschool children at risk for asthma (Bacharier et al). 2009;123:1077-82
Pediatric Dyspnea Scale for use in hospitalized patients with asthma (Khan et al). 2009;123:660-4
Phenotypic predictors of long-term response to inhaled corticosteroid and leukotriene modifier therapies in pediatric asthma (Knuffman et al). 2009;123:411-6
Repeatability of response to asthma medications (Wu et al). 2009;123:385-90
Roles of arginase variants, atopy, and ozone in childhood asthma (Salam et al). 2009;123:596-602
Season of infant bronchiolitis and estimates of subsequent risk and burden of early childhood asthma (Carroll et al). 2009;123:964-6 (Letter to the editor)
Stress and acquired glucocorticoid resistancea relationship hanging in the balance (Wright). 2009;123:831-2 (Editorial)
Television allergy (Rothenberg and Nelson). 2009;123:1198 (News beyond our pages)
Test for Respiratory and Asthma Control in Kids (TRACK)a caregiver-completed questionnaire for preschool-aged children (Murphy et al). 2009;123:833-9
The causal direction in the association between respiratory syncytial virus hospitalization and asthma (Stensballe et al). 2009;123:131-7
The Inhaled Steroid Treatment As Regular Therapy in Early Asthma (START) follow-up study does not support early and daily treatment (Gereda and Baena-Cagnani). 2009;123:710 (Correspondence)
The Inhaled Steroid Treatment As Regular Therapy in Early Asthma (START) follow-up study does not support early and daily treatment (Busse). 2009;123:710-1 (Letter reply)
The protective effect of community factors on childhood asthma (Gupta et al). 2009;123:1297-304
The severity-dependent relationship of infant bronchiolitis on the risk and morbidity of early childhood asthma (Carroll et al). 2009;123:1055-61

Athletes; *see* Exercise

Atopy

CD14 and *IL4R* gene polymorphisms modify the effect of day-care attendance on serum IgE levels (Suzuki et al). 2009;123:1408-11 (Letter to the editor)
Higher serum folate levels are associated with a lower risk of atopy and wheeze (Matsui and Matsui). 2009;123:1253-9

Autoimmune diseases

Anti-CD20 or anti-IgE therapy for severe chronic autoimmune urticaria (Arkwright). 2009;123:510-1 (Correspondence)
Anti-CD20 or anti-IgE therapy for severe chronic autoimmune urticaria (Kaplan et al). 2009;123:511 (Letter reply)

Autoimmunity

A survey of allergists regarding the association of thyroid autoimmunity with chronic urticaria (Sheikh et al). 2009;123:1173-5 (Letter to the editor)
Pathogenicity of IgE in autoimmunitysuccessful treatment of bullous pemphigoid with omalizumab (Fairley et al). 2009;123:704-5 (Letter to the editor)
Therapeutic approaches to allergy and autoimmunity based on the FoxP3$^+$ regulatory T-cell activation and expansion (Miyara et al). 2009;123:749-55

B

B-cell activating factor

A BAFF affirmation (Leung and Szefler). 2009;123:334 (The editors' choice)
Local release of B cell–activating factor of the TNF family after segmental allergen challenge of allergic subjects (Kato et al). 2009;123:369-75

B lymphocytes

Chameleon T_H2 cells (Rothenberg and Nelson). 2009;123:1197 (News beyond our pages)
Toll-like receptor 7–induced naive human B-cell differentiation and immunoglobulin production (Glaum et al). 2009;123:224-30
Transmembrane activator, calcium modulator, and cyclophilin ligand interactor drives plasma cell differentiation in LPS-activated B cells (Ozcan et al). 2009;123:1277-86
Transmembrane activator, calcium modulator, and cyclophilin ligand interactor plays and important role in plasma cell differentiation of B cells (Leung and Szefler). 2009;123:1243 (The editors' choice)

Basophils

Allergen-specific basophil suppression associated with clinical tolerance in patients with milk allergy (Leung and Szefler). 2009;123:772 (The editors' choice)

Allergen-specific basophil suppression associated with clinical tolerance in patients with milk allergy (Wanich et al). 2009;123:789-94

Bed rest
Immune responses in adult female volunteers during the bed-rest model of spaceflight: antibodies and cytokines (Shearer et al). 2009;123:900-5

Bee allergy; *see Hymenoptera*

Beta-adrenergic receptor agonists; *see* Adrenergic beta-agonists

Beta-glucans
House dust mite–derived β-glucans mediate chemokine secretion (Leung and Szefler). 2009;123:580 (The editors' choice)
Innate immune responses of airway epithelium to house dust mite are mediated through β-glucan–dependent pathways (Nathan et al). 2009;123:612-8

Beta lactams
Gene variants of *IL13*, *IL4*, and *IL4RA* are predictors of β-lactam allergy (Apter et al). 2009;123:509-10 (Letter reply)

Bifidobacterium
Prenatal probiotic administration can influence *Bifidobacterium* microbiota development in infants at high risk of allergy (Lahtinen et al). 2009;123:499-501 (Letter to the editor)

Biological markers
Advances in adult asthma diagnosis and treatment and health outcomes, education, delivery, and quality in 2008 (Apter). 2009;123:35-40

Body mass index; *see also* Obesity
Adiposity, serum lipid levels, and allergic sensitization in Chinese men and women (Ouyang et al). 2009;123:940-8
Body mass index, weight gain, and other determinants of lung function decline in adult asthma (Marcon et al). 2009;123:1069-74
Body mass index and phenotype in subjects with mild-to-moderate persistent asthma (Sutherland et al). 2009;123:1328-34
Dyspnea in overweight children: Is it asthma? (Schwartzstein and Gold). 2009;123:1319-20 (Editorial)
Oral contraception, body mass index, and asthma: a cross-sectional Nordic-Baltic population survey (Macsali et al). 2009;123:391-7
Overweight and changes in weight status during childhood in relation to asthma symptoms at 8 years of age (Scholtens et al). 2009;123:1312-8
Prenatal determinants of neonatal lung function in high-risk newborns (Bisgaard et al). 2009;123:651-7

Bradykinin
Genetic analysis of Factor XII and bradykinin catabolic enzymes in a family with estrogen-dependent inherited angioedema (Duan et al). 2009;123:906-10

Breast-feeding
Update on allergies in pregnancy, lactation, and early childhood (Pali-Schöll et al). 2009;123:1012-21 (Current perspectives)

Bronchiolitis
Infant bronchiolitis severity correlates with childhood asthma risk and severity (Leung and Szefler). 2009;123:1025 (The editors' choice)
Season of infant bronchiolitis and estimates of subsequent risk and burden of early childhood asthma (Carroll et al). 2009;123:964-6 (Letter to the editor)
The severity-dependent relationship of infant bronchiolitis on the risk and morbidity of early childhood asthma (Carroll et al). 2009;123:1055-61

Bronchoconstriction
Vitamin C and exercise-induced bronchoconstriction in athletes (Hemilä). 2009;123:274-5 (Correspondence)

Bronchodilator agents
Repeatability of response to asthma medications (Wu et al). 2009;123:385-90

Budesonide
Airway inflammation in patients with asthma with high-fixed or low-fixed plus as-needed budesonide/formoterol (Pavord et al). 2009;123:1083-9

C

Carbohydrates
Intravenous immunoglobulin contains a broad repertoire of anticarbohydrate antibodies that is not restricted to the IgG_2 subclass (von Gunten et al). 2009;123:1268-76
Novel insights into carbohydrate recognition by the humoral immune system (Leung and Szefler). 2009;123:1243 (The editors' choice)
The carbohydrate galactose-α-1,3-galactose is a major IgE-binding epitope on cat IgA (Grönlund et al). 2009;123:1189-91 (Letter to the editor)

Carboplatin
Risk stratification for desensitization of patients with carboplatin hypersensitivity: clinical presentation and management (Hesterberg et al). 2009;123:1262-7
The sooner the better: how timing influences carboplatin skin testing and desensitization (Leung and Szefler). 2009;123:1242 (The editors' choice)

Cardiovascular diseases
Cardiovascular disease risk associated with asthma and respiratory morbidity might be mediated by short-acting β_2-agonists (Appleton et al). 2009;123:124-30

Cartilage-hair hypoplasia
Cartilage-hair hypoplasia and severe allergy (Narra and Shearer). 2009;123:1418-9 (Correspondence)

Cartilage-hair hypoplasia and severe allergy (Ozcan et al). 2009;123:1419-20 (Letter reply)

Cats; *see* Animals, domestic

CCAAT-enhancer-binding proteins
Impaired translation of CCAAT/enhancer binding protein α mRNA in bronchial smooth muscle cells of asthmatic patients (Borger et al). 2009;123:639-45

Cesarean section
Intrauterine bacterial growth at birth and risk of asthma and allergic sensitization among offspring at the age of 15 to 17 years (Keski-Nisula et al). 2009;123:1305-11
Less allergy at age 5 years in cesarean-born children receiving probiotics (Leung and Szefler). 2009;123:333 (The editors' choice)
Probiotics prevent IgE-associated allergy until age 5 years in cesarean-delivered children but not in the total cohort (Kuitunen et al). 2009;123:335-41

Chemokines
$CD34^+$ hemopoietic progenitor cells are potent effectors of allergic inflammation (Allakhverdi et al). 2009;123:472-8
Contribution of CCR4 and CCR8 to antigen-specific T_H2 cell trafficking in allergic pulmonary inflammation (Mikhak et al). 2009;123:67-73
House dust mite–derived β-glucans mediate chemokine secretion (Leung and Szefler). 2009;123:580 (The editors' choice)
Selective deregulation in chemokine signaling pathways of $CD4^+CD25^{hi}CD127^{lo/-}$ regulatory T cells in human allergic asthma (Nguyen et al). 2009;123:933-9

Chinese traditional medicine
Efficacy and mechanisms of action of traditional Chinese medicines for treating asthma and allergy (Li and Brown). 2009;123:297-306
Food Allergy Herbal Formula-2 silences peanut-induced anaphylaxis for a prolonged posttreatment period via IFN-γ–producing $CD8^+$ T cells (Srivastava et al). 2009;123:443-51

Chronic obstructive pulmonary disease (COPD); *see* Lung diseases, obstructive

Cleaning products
Current use of room disinfectants and allergic symptoms at the age of 4 years (Krauss-Etschmann et al). 2009;123:1176-9 (Letter to the editor)

Climate change
Climate change and plant food allergens (Beggs). 2009;123:271 (Correspondence)
Climate change and plant food allergens (Shea et al). 2009;123:272 (Letter reply)

Coagulation
Activation of the blood coagulation cascade is involved in patients with chronic urticaria (Wang et al). 2009;123:972-3 (Correspondence)
Activation of the blood coagulation cascade is involved in patients with chronic urticaria (Asero et al). 2009;123:973-4 (Letter reply)

Cochineal
Molecular cloning, expression, and characterization of a major 38-kd cochineal allergen (Ohgiya et al). 2009;123:1157-62

Cockroaches
Mediator release assay for assessment of biological potency of German cockroach allergen extracts (Nowak-Wegrzyn et al). 2009;123:949-55

Community health services
Eliminating health disparities: What have we done, and what do we do next? (Apter and Casillas). 2009;123:1237-9 (Editorial)
Improving asthma self-efficacy: developing and testing a pilot community-based asthma intervention for African American adults (Martin et al). 2009;123:153-9

Comorbidities
Evolution of patients with nonallergic rhinitis supports conversion to allergic rhinitis (Rondón et al). 2009;123:1098-102

Complement
Peanuts can contribute to anaphylactic shock by activating complement (Khodoun et al). 2009;123:342-51
Why are peanuts so allergenic? (Leung and Szefler). 2009;123:334 (The editors' choice)

Complement C1 inhibitor protein
A Turkish family with a novel mutation in the promoter region of the C1 inhibitor gene (Büyüköztürk et al). 2009;123:962-4 (Letter to the editor)

Complementary therapies; *see also* Chinese traditional medicine
Complementary and alternative medicine: herbs, phytochemicals and vitamins and their immunologic effects (Mainardi). 2009;123:283-94
Complementary and alternative medicine education: need for expanded educational resources for American Academy of Allergy, Asthma & Immunology members (Enger et al). 2009;123:511-2 (Correspondence)
Complementary and alternative medicine for the allergist-immunologist: Where do I start? (Engler et al). 2009;123:309-16 (Current perspectives)

Regulation of T_H17 cells in the mucosal surfaces (Mucida and Salek-Ardakani). 2009;123:997-1003 (Current perspectives)
Targeting cytokines in experimental food allergy (Leung and Szefler). 2009;123:41 (The editors' choice)
T_H17-associated cytokines (IL-17A and IL-17F) in severe asthma (Al-Ramli et al). 2009;123:1185-7 (Letter to the editor)
Unique and overlapping gene expression patterns driven by IL-4 and IL-13 in the mouse lung (Lewis et al). 2009;123:795-804

D

Day care centers
CD14 and *IL4R* gene polymorphisms modify the effect of day-care attendance on serum IgE levels (Suzuki et al). 2009;123:1408-11 (Letter to the editor)

Defensins
IL-17–mediated host defense is partially impaired in patients with atopic eczema (Leung and Szefler). 2009;123:41 (The editors' choice)

Dendritic cells
Allergen-enhanced thrombomodulin (blood dendritic cell antigen 3, CD141) expression on dendritic cells is associated with a T_H2-skewed immune response (Yerkovich et al). 2009;123:209-16
Combined sensitization of mice to extracts of dust mite, ragweed, and *Aspergillus* species breaks through tolerance and establishes chronic features of asthma (Goplen et al). 2009;123:925-32
Der p 1 suppresses indoleamine 2, 3-dioxygenase in dendritic cells from house dust mite–sensitive patients with asthma (Maneechotesuwan et al). 2009;123:239-48
Epithelial cells required for asthma response (Rothenberg and Nelson). 2009;123:1197 (News beyond our pages)
Fms-like tyrosine kinase 3 ligand increases a lung DC subset with regulatory properties in allergic airway inflammation (Shao et al). 2009;123:917-24
IL-33, dendritic cells, and an atypical T_H2 response (Leung and Szefler). 2009;123:1025 (The editors' choice)
IL-33–activated dendritic cells induce an atypical T_H2-type response (Rank et al). 2009;123:1047-54
Interferons modulate FcεRI-dependent production of autoregulatory IL-10 by circulating human monocytoid dendritic cells (Le et al). 2009;123:217-23

Der p 1
A hypoallergenic variant of Der p 1 as a candidate for mite allergy vaccines (Walgraffe et al). 2009;123:1150-6
Allergen impersonator (Rothenberg and Nelson). 2009;123:734 (News beyond our pages)

Dermatitis, atopic
Different effects of pimecrolimus and betamethasone on the skin barrier in patients with atopic dermatitis (Jensen et al). 2009;123:1124-33
IL-17 in atopic eczema: linking allergen-specific adaptive and microbial-triggered innate immune response (Eyerich et al). 2009;123:59-66
IL-17–mediated host defense is partially impaired in patients with atopic eczema (Leung and Szefler). 2009;123:41 (The editors' choice)
IL-22–producing "T22" T cells account for upregulated Il-22 in atopic dermatitis despite reduced IL-17–producing T_H17 T cells (Nograles et al). 2009;123:1244-52
Increased IL-22 levels, independent of T_H17 cells, in patients with chronic atopic dermatitis (Leung and Szefler). 2009;123:1242 (The editors' choice)
Lymphoma among patients with atopic dermatitis and/or treated with topical immunosuppressants in the United Kingdom (Arellano et al). 2009;123:1111-6
The atopic eczema swing shift (Rothenberg and Nelson). 2009;123:517-8 (News beyond our pages)

Dermatitis, contact
$CD4^+CD25^+$ regulatory T cells suppress contact hypersensitivity reactions through a CD39, adenosine-dependent mechanism (Ring et al). 2009;123:1287-96
IL-23 and T_H17-mediated inflammation in human allergic contact dermatitis (Larsen et al). 2009;123:486-92

Desensitization, immunologic
A desensitization protocol for the mAb cetuximab (Jerath et al). 2009;123:260-2 (Letter to the editor)
Alternative algorithm for L-asparaginase allergy in children with acute lymphoblastic leukemia (Soyer et al). 2009;123:895-9
Risk stratification for desensitization of patients with carboplatin hypersensitivity: clinical presentation and management (Hesterberg et al). 2009;123:1262-7
The sooner the better: how timing influences carboplatin skin testing and desensitization (Leung and Szefler). 2009;123:1242 (The editors' choice)

Desloratadine
High-dose desloratadine decreases wheal volume and improves cold provocation thresholds compared with standard-dose treatment in patients with acquired cold urticaria: a randomized, placebo-controlled, crossover study (Siebenhaar et al). 2009;123:672-9

Diagnostic techniques and procedures
Change in visual analog scale score in a pragmatic randomized cluster trial of allergic rhinitis (Bousquet et al). 2009;123:1349-54
Quantitative assessment of allergic shiners in children with allergic rhinitis (Chen et al). 2009;123:665-71

Diarrhea
Antigen-primed splenic $CD8^+$ T cells impede the development of oral antigen–induced allergic diarrhea (Yamada et al). 2009;123:889-94

DiGeorge syndrome
Role of IL-7 in the regulation of T-cell homeostasis in partial DiGeorge syndrome (Tantibhaedhyangkul et al). 2009;123:960-2 (Letter to the editor)

Disinfectants
Current use of room disinfectants and allergic symptoms at the age of 4 years (Krauss-Etschmann et al). 2009;123:1176-9 (Letter to the editor)

Drug approval
US Food and Drug Administration (FDA) Advisory Committees vote against asthma indication for

Serevent and Foradil (Rothenberg and Nelson). 2009;123:277 (News beyond our pages)

Drug hypersensitivity
A desensitization protocol for the mAb cetuximab (Jerath et al). 2009;123:260-2 (Letter to the editor)
Advances in allergic skin disease, anaphylaxis, and hypersensitivity reactions to foods, drugs, and insects in 2008 (Sicherer and Leung). 2009;123:319-27
Anaphylaxis fatalities and admissions in Australia (Liew et al). 2009;123:434-42
Clinical course and urinary eicosanoids in patients with aspirin-induced urticaria followed up for 4 years (Setkowicz et al). 2009;123:174-8
Rational approach to aspirin dosing during oral challenges and desensitization of patients with aspirin-exacerbated respiratory disease (Hope et al). 2009;123:406-10
Risk stratification for desensitization of patients with carboplatin hypersensitivity: clinical presentation and management (Hesterberg et al). 2009;123:1262-7
The influence of hepatic damage on serum soluble Fas ligand levels of patients with drug rashes (Tohyama et al). 2009;123:971-2 (Correspondence)
The influence of hepatic damage on serum soluble Fas ligand levels of patients with drug rashes (Abe et al). 2009;123:972 (Letter reply)
The sooner the better: how timing influences carboplatin skin testing and desensitization (Leung and Szefler). 2009;123:1242 (The editors' choice)

Step-up therapy in uncontrolled asthma: choices and outcomes (Sears). 2009;123:122-3
Stress and acquired glucocorticoid resistance: a relationship hanging in the balance (Wright). 2009;123:831-2
T cells in health and disease (Akdis). 2009;123:1022-3
The effect of obesity on asthma incidence: moving past the epidemiologic evidence (Clerisme-Beaty and Rand). 2009;123:96-7
The perfectly potent peanut (Shreffler). 2009;123:352-3
Therapeutic efficacy of omalizumab (MacGlashan). 2009;123:114-5

Eicosanoids
Clinical course and urinary eicosanoids in patients with aspirin-induced urticaria followed up for 4 years (Setkowicz et al). 2009;123:174-8

Emergency medical services
How well are US emergency departments taking care of asthmatic patients? (Leung and Szefler). 2009;123:333 (The editors' choice)
Quality of care for acute asthma in 63 US emergency departments (Tsai et al). 2009;123:354-61

Endothelial cells
Endothelial G protein required in systemic anaphylaxis (Rothenberg and Nelson). 2009;123:734 (News beyond our pages)

Endotoxins
Toll-like receptor 4 variants reduce airway response at high endotoxin levels (Leung and Szefler). 2009;123:1024 (The editors' choice)

Toll-like receptor 4 variants reduce airway response in human subjects at high endotoxin levels in a swine facility (Senthilselvan et al). 2009;123:1034-40

Enterotoxins

Prostaglandin E_2 suppresses staphylococcal enterotoxin–induced eosinophilia-associated cellular responses dominantly through an E-prostanoid 2–mediated pathway in nasal polyps (Okano et al). 2009;123:868-74

Environmental exposure; *see also* Farm exposure; Gene-environment interactions; Hygiene hypothesis; Occupational exposure

Advances in adult asthma diagnosis and treatment and health outcomes, education, delivery, and quality in 2008 (Apter). 2009;123:35-40

Advances in environmental and occupational disorders in 2008 (Bush and Peden). 2009;123:575-8

Deciphering gene-environment interactions through mouse models of allergic asthma (Willis-Owen and Valdar). 2009;123:14-23

Early peanut consumption: postpone or promote? (Burks). 2009;123:424-5 (Editorial)

Gene-environment interactions: the road less traveled by in asthma genetics (Vercelli). 2009;123:26-7 (Editorial)

Gene-environment interactions in asthma (von Mutius). 2009;123:3-11

Household peanut consumption as a risk factor for the development of peanut allergy (Fox et al). 2009;123:417-23

Eosinophilia

Anti–IL-5 (mepolizumab) therapy does not alter IL-5 receptor α levels in patients with eosinophilic esophagitis (Conus et al). 2009;123:269 (Correspondence)

Anti–IL-5 (mepolizumab) therapy does not alter IL-5 receptor α levels in patients with eosinophilic esophagitis (Rothenberg and Stein). 2009;123:269-70 (Letter reply)

Treatment of *FIP1L1/PDGFRA*-negative hypereosinophilic syndrome with alemtuzumab, an anti-CD52 antibody (Wagner et al). 2009;123:1407-8 (Letter to the editor)

Eosinophils

Airway inflammation in patients with asthma with high-fixed or low-fixed plus as-needed budesonide/formoterol (Pavord et al). 2009;123:1083-9

Allergic airway hyperresponsiveness, inflammation, and remodeling do not develop in phosphoinositide 3-kinase γ–deficient mice (Takeda et al). 2009;123:805-12

Eosinophils co-opted for parasite survival (Rothenberg and Nelson). 2009;123:733 (News beyond our pages)

Evaluation of serum s-IgE/total IgE ratio in predicting clinical response to allergen-specific immunotherapy (Di Lorenzo et al). 2009;123:1103-10

Fluticasone furoate nasal spray reduces the nasal-ocular reflex: a mechanism for the efficacy of topical steroids in controlling allergic eye symptoms (Baroody et al). 2009;123:1342-8

IL-5–mediated eosinophil survival requires Pim-1 but not PI3K (Leung and Szefler). 2009;123:580 (The editors' choice)

Proviral integration site for Moloney murine leukemia virus 1, but not phosphatidylinositol-3 kinase, is essential in the antiapoptotic signaling cascade initiated by IL-5 in eosinophils (Andina et al). 2009;123:603-11

Redefining the role of eosinophils in asthma (Rothenberg and Nelson). 2009;123:975-6 (News beyond our pages)

The "ins" and "outs" of eosinophils (Rothenberg and Nelson). 2009;123:277-8 (News beyond our pages)

Epinephrine

estrogen-dependent inherited angioedema (Duan et al). 2009;123:906-10

Farm exposure

Farm exposure—a novel natural model of immunotherapy against allergic diseases? (Leung and Szefler). 2009;123:772 (The editors' choice)

Maternal farm exposure modulates neonatal immune mechanisms through regulatory T cells (Schaub et al). 2009;123:774-82

Fas ligand protein

The influence of hepatic damage on serum soluble Fas ligand levels of patients with drug rashes (Tohyama et al). 2009;123:971-2 (Correspondence)

The influence of hepatic damage on serum soluble Fas ligand levels of patients with drug rashes (Abe et al). 2009;123:972 (Letter reply)

Fenugreek

Allergenicity and antigenicity of fenugreek *(Trigonella foenum-graecum)* proteins in foods (Kruse Fæste et al). 2009;123:187-94

Fibroblasts

Airway smooth muscle hyperplasia in asthma—a consequence of fibrocyte recruitment? (Leung and Szefler). 2009;123:334 (The editors' choice)

Fibrocyte localization to the airway smooth muscle is a feature of asthma (Saunders et al). 2009;123:376-84

Filaggrin

An interaction between filaggrin mutations and early food sensitization improves the prediction of childhood asthma (Marenholz et al). 2009;123:911-6

Meta-analysis of filaggrin polymorphisms in eczema and asthma: robust risk factors in atopic disease (Rodriquez et al). 2009;123:1361-70

Risk of early childhood eczema (Bisgaard et al). 2009;123:1355-60

Fluticasone

Fluticasone furoate nasal spray reduces the nasal-ocular reflex: a mechanism for the efficacy of topical steroids in controlling allergic eye symptoms (Baroody et al). 2009;123:1342-8

Folic acid

Has mandatory folic acid supplementation of foods increased the risk of asthma and allergic disease? (Ownby). 2009;123:1260-1 (Editorial)

Higher folate levels might protect against allergies and asthma (Leung and Szefler). 2009;123:1242 (The editors' choice)

Higher serum folate levels are associated with a lower risk of atopy and wheeze (Matsui and Matsui). 2009;123:1253-9

Food challenge; *see* Allergen challenge

Food hypersensitivity; *see also specific foods*

Advances in allergic skin disease, anaphylaxis, and hypersensitivity reactions to foods, drugs, and insects in 2008 (Sicherer and Leung). 2009;123:319-27

Allergenicity and antigenicity of fenugreek *(Trigonella foenum-graecum)* proteins in foods (Kruse Fæste et al). 2009;123:187-94

An interaction between filaggrin mutations and early food sensitization improves the prediction of childhood asthma (Marenholz et al). 2009;123:911-6

Anaphylaxis provoked by ingestion of marshmallows containing fish gelatin (Kuehn et al). 2009;123:708-9 (Letter to the editor)

Antigen-primed splenic $CD8^+$ T cells impede the development of oral antigen–induced allergic diarrhea (Yamada et al). 2009;123:889-94

Automatic epinephrine device use in children with food allergies (Arkwright). 2009;123:267-8 (Correspondence)

Automatic epinephrine device use in children with food allergies (Järvinen et al). 2009;123:268 (Letter reply)

Climate change and plant food allergens (Beggs). 2009;123:271 (Correspondence)

Climate change and plant food allergens (Shea et al). 2009;123:272 (Letter reply)

Component-resolved *in vitro* diagnosis of hazelnut allergy in Europe (Hansen et al). 2009;123:1134-41

Delayed anaphylaxis, angioedema, or urticaria after consumption of red meat in patients with IgE antibodies specific for galactose-α-1,3-galactose (Commins et al). 2009;123:426-33

Food allergy organizations merge (Rothenberg and Nelson). 2009;123:734 (News beyond our pages)

Impairing oral tolerance promotes allergy and anaphylaxis: a new murine food allergy model (Ganeshan et al). 2009;123:231-8

Molecular cloning, expression, and characterization of a major 38-kd cochineal allergen (Ohgiya et al). 2009;123:1157-62

Soybean *(Glycine max)* allergy in EuropeGly m 5 (β-conglycinin) and Gly m 6 (glycinin) are potential diagnostic markers for severe allergic reactions to soy (Holzhauser et al). 2009;123:452-8

Targeting cytokines in experimental food allergy (Leung and Szefler). 2009;123:41 (The editors' choice)

Targeting IL-4/IL-13 signaling to alleviate oral allergen–induced diarrhea (Brandt et al). 2009;123:53-8

Work Group report: oral food challenge testing (Nowak-Wegrzyn et al). 2009;123:S361-S378

FOXP3 protein

T_H17 cells and regulatory T cells in primary immunodeficiency diseases (Ochs et al). 2009;123:977-83

Therapeutic approaches to allergy and autoimmunity based on the $FoxP3^+$ regulatory T-cell activation and expansion (Miyara et al). 2009;123:749-55

Fungal infections
Mucormycosis in chronic granulomatous diseaseassociation with iatrogenic immunosuppression (Vinh et al). 2009;123: 1411-3 (Letter to the editor)

G

Galactose
Delayed anaphylaxis, angioedema, or urticaria after consumption of red meat in patients with IgE antibodies specific for galactose-α-1,3-galactose (Commins et al). 2009;123:426-33

Gastroesophageal reflux
Treatment of silent reflux does not improve poorly controlled asthma (Rothenberg and Nelson). 2009;123:1197-8 (News beyond our pages)

GATA3 transcription factor
Genetic variants in the *GATA3* gene are not associated with asthma and atopic diseases in German children (Suttner et al). 2009;123:1179-81 (Letter to the editor)

Gene-environment interactions
Advances in pediatric asthma in 2008: Where do we go now? (Szefler). 2009;123:28-34
Deciphering gene-environment interactions through mouse models of allergic asthma (Willis-Owen and Valdar). 2009;123:14-23
Gene-environment interactions: the road less traveled by in asthma genetics (Vercelli). 2009;123:26-7 (Editorial)
Gene-environment interactions in asthma (von Mutius). 2009;123:3-11
Toll-like receptor 4 variants reduce airway response in human subjects at high endotoxin levels in a swine facility (Senthilselvan et al). 2009;123:1034-40

Gene expression
Unique IL-4– and IL-13–driven gene signatures in the mouse lung (Leung and Szefler). 2009;123:773 (The editors' choice)

Gene therapy
Gene therapy delivers (Rothenberg and Nelson). 2009;123:733-4 (News beyond our pages)

Genes; *see also* Heredity; Polymorphism
Advances in mechanisms of asthma, allergy, and immunology in 2008 (Boyce et al). 2009;123: 569-74
All rhinoviruses sequenced (Rothenberg and Nelson). 2009;123:975 (News beyond our pages)
LAD-1/variant linked to kindlin-3 gene mutation (Rothenberg and Nelson). 2009;123:517 (News beyond our pages)

Glucocorticoids
Parental support and cytokine activity in childhood asthmathe role of glucocorticoid sensitivity (Miller et al). 2009;123:824-30
Stress and acquired glucocorticoid resistancea relationship hanging in the balance (Wright). 2009;123:831-2 (Editorial)

Glutathione
Airway glutathione homeostasis is altered in children with severe asthmaevidence for oxidant stress (Fitzpatrick et al). 2009;123:146-52

Granulocytes
Selective and direct activation of human neutrophils but not eosinophils by Toll-like receptor 8 (Janke et al). 2009;123:1026-33
Toll-like receptor 8 in neutrophils: the danger of systemic toxicity (Leung and Szefler). 2009;123: 1024 (The editors' choice)

Grass pollen
Change in visual analog scale score in a pragmatic randomized cluster trial of allergic rhinitis (Bousquet et al). 2009;123:1349-54
Efficacy and safety of 5-grass-pollen sublingual immunotherapy tablets in pediatric allergic rhinoconjunctivitis (Wahn et al). 2009;123: 160-6
Safety and efficacy in children of an SQ-standardized grass allergen tablet for sublingual immunotherapy (Bufe et al). 2009;123:167-73
Streamlining immunotherapy (Rothenberg and Nelson). 2009;123:1 (News beyond our pages)

Guidelines
Advances in pediatric asthma in 2008: Where do we go now? (Szefler). 2009;123:28-34
How well are US emergency departments taking care of asthmatic patients? (Leung and Szefler). 2009;123:333 (The editors' choice)
Quality of care for acute asthma in 63 US emergency departments (Tsai et al). 2009;123:354-61
Test for Respiratory and Asthma Control in Kids (TRACK)a caregiver-completed questionnaire for preschool-aged children (Murphy et al). 2009;123: 833-9
Work Group reportoral food challenge testing (Nowak-Wegrzyn et al). 2009;123:S361-S378

H

Hay fever
Disparities in allergic diseasehypersensitivity and social disorders (Cohen). 2009;123:1422-4 (The allergy archives)

Health care disparities
Eliminating health disparities: What have we done, and what do we do next? (Apter and Casillas). 2009;123:1237-9 (Editorial)
Health care settings around the world. 2009;123: 1240-1
The protective effect of community factors on childhood asthma (Gupta et al). 2009;123:1297-1304

Hepatic damage
The influence of hepatic damage on serum soluble Fas ligand levels of patients with drug rashes (Tohyama et al). 2009;123:971-2 (Correspondence)

The influence of hepatic damage on serum soluble Fas ligand levels of patients with drug rashes (Abe et al). 2009;123:972 (Letter reply)

Herbal medicine

Complementary and alternative medicineherbs, phytochemicals and vitamins and their immunologic effects (Mainardi). 2009;123:283-94

Complementary and alternative medicine for the allergist-immunologist: Where do I start? (Engler et al). 2009;123:309-16 (Current perspectives)

Heredity

Disparities in allergic disease: hypersensitivity and social disorders (Cohen). 2009;123:1422-4 (The allergy archives)

Specific allergic sensitization in parents and their 18-yearold offspring in the Suburban Detroit Childhood Allergy Study. 2009;123:1401-6

Histamine

Contribution of histamine metabolism to tachyphylaxis during the buildup phase of rush immunotherapy (Maintz et al). 2009;123:701-3 (Letter to the editor)

Histamine receptors; *see* Receptors, histamine

History of medicine

Jack Pepys (May 15, 1914–September 9, 1996): a personal recollection (Pepys). 2009;123:718-20 (The allergy archives)

Jack Pepys' contributions to the medical literature (Nelson). 2009;123:720-3 (The allergy archives)

HIV infections

Advances in basic and clinical immunology in 2008 (Chinen and Shearer). 2009;123:328-32

Opsonic function of bronchoalveolar lavage IgG after pneumococcal vaccination in HIV-infected and uninfected adults (Tam et al). 2009;123:1420-1 (Correspondence)

Preclinical development of the green tea catechin, epigallocatechin gallate, as an HIV-1 therapy (Nance et al). 2009;123:459-65

Homeobox transcription factors

HLX1 gene variants influence the development of childhood asthma (Leung and Szefler). 2009;123: 42 (The editors' choice)

HLX1 gene variants influence the development of childhood asthma (Suttner et al). 2009;123:82-8

Hospitalization

Pediatric Dyspnea Scale for use in hospitalized patients with asthma (Khan et al). 2009;123:660-4

Respiratory syncytial virus: back to basics (Glezen). 2009;123:404-5 (Editorial)

Respiratory syncytial virus neutralizing antibodies in cord blood, respiratory syncytial virus hospitalization, and recurrent wheeze (Stensballe et al). 2009;123:398-403

The causal direction in the association between respiratory syncytial virus hospitalization and asthma (Stensballe et al). 2009;123:131-7

Hygiene hypothesis; *see also* Environmental exposure; Farm exposure

Rural health disparities in asthma care and outcomes (Valet et al). 2009;123:1220-5 (Current perspectives)

Hymenoptera

Clonal mast cell disorders in patients with systemic reactions to *Hymenoptera* stings and increased serum tryptase levels (Bonadonna et al). 2009;123: 680-6

Serum cytotoxic T lymphocyte–associated antigen 4 in *Hymenoptera* venom allergy and its modulation by specific immunotherapy (Saverino et al). 2009;123:258-60 (Letter to the editor)

Sublingual immunotherapy with venom is not recommended for patients with *Hymenoptera* venom allergy (Ruëff et al). 2009;123:272-3 (Correspondence)

Sublingual immunotherapy with venom is not recommended for patients with *Hymenoptera* venom allergy (Passalacqua). 2009;123:273 (Letter reply)

Switch-hitting T cells (Rothenberg and Nelson). 2009;123:2 (News beyond our pages)

Venom immunotherapy reduces large local reactions to insect stings (Golden et al). 2009;123:1371-5

Hyper-IgE syndrome; *see* Job's syndrome

Hypersensitivity

Platelets play important roles in the late phase of the immediate hypersensitivity reaction (Tamagawa-Mineoka et al). 2009;123:581-7

Significant involvement of platelets in the late phase of immediate hypersensitivity reaction (Leung and Szefler). 2009;123:579 (The editors' choice)

I

IgE

Associations between pre-employment immunologic and airway mucosal factors and the development of occupational allergy (Krop et al). 2009;123: 694-700

Asthma symptom re-emergence after omalizumab withdrawal correlates well with increasing IgE and decreasing pharmacokinetic concentrations (Slavin et al). 2009;123:107-13

Cartilage-hair hypoplasia and severe allergy (Narra and Shearer). 2009;123:1418-9 (Correspondence)

Cartilage-hair hypoplasia and severe allergy (Ozcan et al). 2009;123:1419-20 (Letter reply)

Determinants of allergenicity (Traidl-Hoffmann et al). 2009;123:558-66 (Current perspectives)

Evaluation of serum s-IgE/total IgE ratio in predicting clinical response to allergen-specific immunotherapy (Di Lorenzo et al). 2009;123: 1103-10

High-titer IgE antibody specific for pollen allergens in northern California is associated with both wheezing and total serum IgE (Erwin et al). 2009;123:706-8 (Letter to the editor)

Higher serum folate levels are associated with a lower risk of atopy and wheeze (Matsui and Matsui). 2009;123:1253-9
Relationships among prenatal aeroallergen exposure and maternal and cord blood IgE: project ACCESS (Peters et al). 2009;123:1041-6
Specific allergic sensitization in parents and their 18-yearold offspring in the Suburban Detroit Childhood Allergy Study. 2009;123:1401-6
Therapeutic efficacy of omalizumab (MacGlashan). 2009;123:114-5 (Editorial)
Virus-specific IgE enhances airway responsiveness on reinfection with respiratory syncytial virus in newborn mice (Dakhama et al). 2009;123:138-45

IgG
Antibody response to pneumococcal vaccination as a function of preimmunization titer (Hare et al). 2009;123:195-200
Intravenous immunoglobulin contains a broad repertoire of anticarbohydrate antibodies that is not restricted to the IgG_2 subclass (von Gunten et al). 2009;123:1268-76
Novel insights into carbohydrate recognition by the humoral immune system (Leung and Szefler). 2009;123:1243 (The editors' choice)

Images in allergy

Immune response
Health care settings around the world. 2009;123:1240-1
IL-33–activated dendritic cells induce an atypical T_H2-type response (Rank et al). 2009;123:1047-54
Immune responses in adult female volunteers during the bed-rest model of spaceflightantibodies and cytokines (Shearer et al). 2009;123:900-5
Regulatory T cells suppress skin inflammation by adenosine production (Leung and Szefler). 2009;123:1243 (The editors' choice)
T cells in health and disease (Akdis). 2009;123:1022-3 (Editorial)
UV-B radiation induces the expression of antimicrobial peptides in human keratinocytes *in vitro* and *in vivo* (Gläser et al). 2009;123:1117-23

Immune tolerance
Adaptive regulatory T (Treg) cells are associated with tolerance to milk allergen (Leung and Szefler). 2009;123:41 (The editors' choice)
Allergen-specific basophil suppression associated with clinical tolerance in patients with milk allergy (Leung and Szefler). 2009;123:772 (The editors' choice)
Allergen-specific basophil suppression associated with clinical tolerance in patients with milk allergy (Wanich et al). 2009;123:789-94
Association of allergen-specific regulatory T cells with the onset of clinical tolerance to milk protein (Shreffler et al). 2009;123:43-52
Combined sensitization of mice to extracts of dust mite, ragweed, and *Aspergillus* species breaks through tolerance and establishes chronic features of asthma (Goplen et al). 2009;123:925-32
Impairing oral tolerance promotes allergy and anaphylaxis: a new murine food allergy model (Ganeshan et al). 2009;123:231-8
Mechanisms and treatment of allergic disease in the big picture of regulatory T cells (Akdis and Akdis). 2009;123:735-46
Switch-hitting T cells (Rothenberg and Nelson). 2009;123:2 (News beyond our pages)
Transplacental tolerance (Rothenberg and Nelson). 2009;123:518 (News beyond our pages)

Immunity
Who knew? (Rothenberg and Nelson). 2009;123:2 (News beyond our pages)

Immunity, innate
Innate immune responses of airway epithelium to house dust mite are mediated through β-glucan–dependent pathways (Nathan et al). 2009;123:612-8

Immunity, maternally-acquired
Farm exposure—a novel natural model of immunotherapy against allergic diseases? (Leung and Szefler). 2009;123:772 (The editors' choice)
Maternal farm exposure modulates neonatal immune mechanisms through regulatory T cells (Schaub et al). 2009;123:774-82
Maternal prenatal allergen exposure and immune response influence cord blood IgE (Leung and Szefler). 2009;123:1024 (The editors' choice)
Relationships among prenatal aeroallergen exposure and maternal and cord blood IgE: project ACCESS (Peters et al). 2009;123:1041-6
Respiratory syncytial virusback to basics (Glezen). 2009;123:404-5 (Editorial)
Respiratory syncytial virus neutralizing antibodies in cord blood, respiratory syncytial virus hospitalization, and recurrent wheeze (Stensballe et al). 2009;123:398-403
Transplacental tolerance (Rothenberg and Nelson). 2009;123:518 (News beyond our pages)

Immunization
A hypoallergenic variant of Der p 1 as a candidate for mite allergy vaccines (Walgraffe et al). 2009;123:1150-6
Antibody response to pneumococcal vaccination as a function of preimmunization titer (Hare et al). 2009;123:195-200
Opsonic function of bronchoalveolar lavage IgG after pneumococcal vaccination in HIV-infected and uninfected adults (Tam et al). 2009;123:1420-1 (Correspondence)

Immunocompromised hosts

Anaphylaxis in Olmsted County: seasonal pattern and suggestions for epidemiologic analysis (Decker et al). 2009;123:1194-5 (Letter reply)
Venom immunotherapy reduces large local reactions to insect stings (Golden et al). 2009;123:1371-5

Integrative medicine
Complementary and alternative medicine for the allergist-immunologist: Where do I start? (Engler et al). 2009;123:309-16 (Current perspectives)
Role of complementary and alternative medicine in the field of allergy and clinical immunology (Sampson). 2009;123:317-8 (Editorial)
Interferons
Does the T_H1/ T_H2 paradigm fit for human T cells? (Leung and Szefler). 2009;123:773 (The editors' choice)
Interferons modulate FcεRI-dependent production of autoregulatory IL-10 by circulating human monocytoid dendritic cells (Le et al). 2009;123: 217-23
T-box 21 transcription factor is responsible for distorted T_H2 differentiation in human peripheral $CD4^+$ T cells (Kaminuma et al). 2009;123:813-23
Interleukins; *see also* Receptors, interleukin
Gene variants of *IL13*, *IL4*, and *IL4RA* are predictors of β-lactam allergy (Guéant et al). 2009;123:509 (Correspondence)
Gene variants of *IL13*, *IL4*, and *IL4RA* are predictors of β-lactam allergy (Apter et al). 2009;123:509-10 (Letter reply)
Interleukin-2 (IL-2)
IL-2– and CD25-dependent immunoregulatory mechanisms in the homeostasis of T-cell subsets (Létourneau et al). 2009;123:758-62 (Current perspectives)
Interleukin-4 (IL-4)
Chameleon T_H2 cells (Rothenberg and Nelson). 2009;123:1197 (News beyond our pages)
Differential activation of type I receptors by IL-4 and IL-13 (Rothenberg and Nelson). 2009;123: 518 (News beyond our pages)
Targeting IL-4/IL-13 signaling to alleviate oral allergen induced diarrhea (Brandt et al). 2009;123: 53-8
Unique IL-4– and IL-13–driven gene signatures in the mouse lung (Leung and Szefler). 2009;123:773 (The editors' choice)
Interleukin-5 (IL-5)
IL-5–mediated eosinophil survival requires Pim-1 but not PI3K (Leung and Szefler). 2009;123:580 (The editors' choice)
Proviral integration site for Moloney murine leukemia virus 1, but not phosphatidylinositol-3 kinase, is essential in the antiapoptotic signaling cascade initiated by IL-5 in eosinophils (Andina et al). 2009;123:603-11
Interleukin-10 (IL-10)
Interferons modulate FcεRI-dependent production of autoregulatory IL-10 by circulating human monocytoid dendritic cells (Le et al). 2009;123: 217-23
Interleukin-13 (IL-13)
Differential activation of type I receptors by IL-4 and IL-13 (Rothenberg and Nelson). 2009;123:518 (News beyond our pages)
Targeting IL-4/IL-13 signaling to alleviate oral allergen–induced diarrhea (Brandt et al). 2009;123: 53-8
Unique and overlapping gene expression patterns driven by IL-4 and IL-13 in the mouse lung (Lewis et al). 2009;123:795-804
Unique IL-4– and IL-13–driven gene signatures in the mouse lung (Leung and Szefler). 2009;123:773 (The editors' choice)
Interleukin-17 (IL-17)
Development and function of T_H17 cells in health and disease (Louten et al). 2009;123:1004-11 (Current perspectives)
Differentiation and functional analysis of human T_H17 cells (Burgler et al). 2009;123:588-95
Functional definition of the T_H17 phenotype (Leung and Szefler). 2009;123:579 (The editors' choice)
IL-17 in atopic eczema: linking allergen-specific adaptive and microbial-triggered innate immune response (Eyerich et al). 2009;123:59-66
IL-17–mediated host defense is partially impaired in patients with atopic eczema (Leung and Szefler). 2009;123:41 (The editors' choice)
IL-17–producing T cells in lung immunity and inflammation (Nembrini and Kopf). 2009;123: 986-94
Role of IL-7 in the regulation of T-cell homeostasis in partial DiGeorge syndrome (Tantibhaedhyangkul et al). 2009;123:960-2 (Letter to the editor)
Interleukin-22 (IL-22)
IL-22–producing "T22" T cells account for upregulated Il-22 in atopic dermatitis despite reduced IL-17–producing T_H17 T cells (Nograles et al). 2009;123:1244-52
Increased IL-22 levels, independent of T_H17 cells, in patients with chronic atopic dermatitis (Leung and Szefler). 2009;123:1242 (The editors' choice)
Interleukin-23 (IL-23)
IL-23 and T_H17-mediated inflammation in human allergic contact dermatitis (Larsen et al). 2009;123: 486-92
Interleukin-25 (IL-25)
Natural killer T (NKT) cells respond to IL-25 to cause airway hyperreactivity (Rothenberg and Nelson). 2009;123:278 (News beyond our pages)
Interleukin-31 (IL-31)
Histamine 4 receptor, IL-31, and pruritus—new links discovered? (Leung and Szefler). 2009;123:580 (The editors' choice)
The histamine H_4 receptor is functionally expressed on T_H2 cells (Gutzmer et al). 2009;123:619-25
Interleukin-33 (IL-33)
IL-33, dendritic cells, and an atypical T_H2 response (Leung and Szefler). 2009;123:1025 (The editors' choice)

IL-33–activated dendritic cells induce an atypical T_H2-type response (Rank et al). 2009;123:1047-54

Isocyanates

Occupational asthma: current concepts in pathogenesis, diagnosis, and management (Dykewicz). 2009;123:519-28

IVIG; *see* Immunoglobulins, intravenous

J

Job's syndrome

A novel mutation in the linker domain of the signal transducer and activator of transcription 3 gene, p.Lys531Glu, in hyper-IgE syndrome (Kim et al). 2009;123:956-8 (Letter to the editor)

K

Kallikrein

Angioedema and estrogen-dependent angioedema with activation of the contact system (Hentges et al). 2009;123:262-4 (Letter to the editor)

Prostatic kallikrein: a new major dog allergen (Mattsson et al). 2009;123:362-8

Prostatic kallikrein—a new major dog allergen (Leung and Szefler). 2009;123:333 (The editors' choice)

Keratinocytes

Cytokine milieu modulates release of thymic stromal lymphopoietin from human keratinocytes stimulated with double-stranded RNA (Kinoshita et al). 2009;123:179-86

UV-B radiation induces the expression of antimicrobial peptides in human keratinocytes *in vitro* and *in vivo* (Gläser et al). 2009;123:1117-23

Kindlin-3 activation

LAD-1/variant linked to kindlin-3 gene mutation (Rothenberg and Nelson). 2009;123:517 (News beyond our pages)

L

Lactobacillus*; *see Probiotics

Letters to the editor; *see also* Correspondence

A desensitization protocol for the mAb cetuximab (Jerath et al). 2009;123:260-2

A novel mutation in the linker domain of the signal transducer and activator of transcription 3 gene, p.Lys531Glu, in hyper-IgE syndrome (Kim et al). 2009;123:956-8

A survey of allergists regarding the association of thyroid autoimmunity with chronic urticaria (Sheikh et al). 2009;123:1173-5

A Turkish family with a novel mutation in the promoter region of the C1 inhibitor gene (Büyüköztürk et al). 2009;123:962-4

Anaphylaxis provoked by ingestion of marshmallows containing fish gelatin (Kuehn et al). 2009;123:708-9

Angioedema and estrogen-dependent angioedema with activation of the contact system (Hentges et al). 2009;123:262-4

CD14 and *IL4R* gene polymorphisms modify the effect of day-care attendance on serum IgE levels (Suzuki et al). 2009;123:1408-11

Clinical and genetic diagnosis of warts, hypogammaglobulinemia, infections, and myelokathexis syndrome in 10 patients (Tassone et al). 2009;123:1170-3

Contribution of histamine metabolism to tachyphylaxis during the buildup phase of rush immunotherapy (Maintz et al). 2009;123:701-3

Current use of room disinfectants and allergic symptoms at the age of 4 years (Krauss-Etschmann et al). 2009;123:1176-9

Frequency and clinical implications of skin autoreactivity to serum versus plasma in patients with chronic urticaria (Metz et al). 2009;123:705-6

Genetic variants in the *GATA3* gene are not associated with asthma and atopic diseases in German children (Suttner et al). 2009;123:1179-81

High-titer IgE antibody specific for pollen allergens in northern California is associated with both wheezing and total serum IgE (Erwin et al). 2009;123:706-8

Monitoring bacteriostasis in allergen extract mixing: 10 years of culture data (Letz et al). 2009;123:1175-6

Mucormycosis in chronic granulomatous disease: association with iatrogenic immunosuppression (Vinh et al). 2009;123:1411-3

Natural killer T cells in the lungs of patients with asthma (Matangkasombut et al). 2009;123:1181-5

Novel presentation of Omenn syndrome in association with aniridia (Sheehan et al). 2009;123:966-9

Pathogenicity of IgE in autoimmunity: successful treatment of bullous pemphigoid with omalizumab (Fairley et al). 2009;123:704-5

Prenatal probiotic administration can influence *Bifidobacterium* microbiota development in infants at high risk of allergy (Lahtinen et al). 2009;123:499-501

Respiratory sensitization of a worker to the warehouse beetle *Trogoderma variabile:* an index case (Bernstein et al). 2009;123:1413-6

Role of IL-7 in the regulation of T-cell homeostasis in partial DiGeorge syndrome (Tantibhaedhyangkul et al). 2009;123:960-2

Season of infant bronchiolitis and estimates of subsequent risk and burden of early childhood asthma (Carroll et al). 2009;123:964-6

Serum cytotoxic T lymphocyte–associated antigen 4 in *Hymenoptera* venom allergy and its modulation by specific immunotherapy (Saverino et al). 2009;123:258-60

Signal transducer and activator of transcription 5 tyrosine phosphorylation for the diagnosis and monitoring of patients with severe combined immunodeficiency (Walshe et al). 2009;123:505-8

Successful treatment of chronic drug-resistant urticaria with alprazolam (Dueñas-Laita et al). 2009;123: 504-5

T_H17-associated cytokines (IL-17A and IL-17F) in severe asthma (Al-Ramli et al). 2009;123:1185-7

The acute effect of swimming on airway inflammation in adolescent elite swimmers (Pedersen et al). 2009;123:502-4

The carbohydrate galactose-α-1,3-galactose is a major IgE-binding epitope on cat IgA (Grönlund et al). 2009;123:1189-91

Thymic stromal lymphopoietin as a mediator of crosstalk between bronchial smooth muscles and mast cells (Allakhverdi et al). 2009;123: 958-60

Toll-like receptor 3 enhances late-phase reaction of experimental allergic conjunctivitis (Ueta et al). 2009;123:1187-9

Treatment of *FIP1L1/PDGFRA*-negative hypereosinophilic syndrome with alemtuzumab, an anti-CD52 antibody (Wagner et al). 2009;123: 1407-8

Leukemia

Alternative algorithm for L-asparaginase allergy in children with acute lymphoblastic leukemia (Soyer et al). 2009;123:895-9

Leukocyte adhesion deficiency-1/variant

LAD-1/variant linked to kindlin-3 gene mutation (Rothenberg and Nelson). 2009;123:517 (News beyond our pages)

Leukotriene antagonists

Phenotypic predictors of long-term response to inhaled corticosteroid and leukotriene modifier therapies in pediatric asthma (Knuffman et al). 2009;123:411-6

Leukotriene receptors; *see* Receptors, leukotriene

Levalbuterol

Levalbuterol kinetics (Lipworth and Clearie). 2009;123:275 (Correspondence)

Lung diseases, obstructive

Inhaled corticosteroids (ICSs) in COPD: a note of caution (Rothenberg and Nelson). 2009;123:278 (News beyond our pages)

Lung function

Body mass index, weight gain, and other determinants of lung function decline in adult asthma (Marcon et al). 2009;123:1069-74

Body mass index and phenotype in subjects with mild-to-moderate persistent asthma (Sutherland et al). 2009;123:1328-34

Exposure to traffic: lung function and health status in adults with asthma (Balmes et al). 2009;123: 626-31

In asthma, the apple falls faster than the pear (Tantisira). 2009;123:1075-6 (Editorial)

Increased asthma and respiratory symptoms in children exposed to petrochemical pollution (Wichmann et al). 2009;123:632-8

Lung function test results in normal infantsa COPSAC sequel (Yemen and Gaston). 2009;123:658-9 (Editorial)

PLAUR polymorphisms are associated with asthma, PLAUR levels, and lung function decline (Barton et al). 2009;123:1391-1400

Prenatal determinants of neonatal lung function in high-risk newborns (Bisgaard et al). 2009;123: 651-7

Lymphoma

Lymphoma among patients with atopic dermatitis and/or treated with topical immunosuppressants in the United Kingdom (Arellano et al). 2009;123: 1111-6

M

Markers, biological or clinical; *see* Biological markers

Mast cells

Advances in mechanisms of asthma, allergy, and immunology in 2008 (Boyce et al). 2009;123: 569-74

Mast cells as antigen-presenting cells (Leung and Szefler). 2009;123:42 (The editors' choice)

Notch signaling confers antigen-presenting cell functions on mast cells (Nakano et al). 2009;123: 74-81

Thymic stromal lymphopoietin as a mediator of crosstalk between bronchial smooth muscles and mast cells (Allakhverdi et al). 2009;123:958-60 (Letter to the editor)

Turning mast cells on and off (Rothenberg and Nelson). 2009;123:733 (News beyond our pages)

Vascular endothelial growth factors synthesized by human lung mast cells exert angiogenic effects (Detoraki et al). 2009;123:1142-9

Why are peanuts so allergenic? (Leung and Szefler). 2009;123:334 (The editors' choice)

Mastocytosis

Assessing anaphylactic risk? Consider mast cell clonality (Metcalfe and Schwartz). 2009;123: 687-8 (Editorial)

Clonal mast cell disorders in patients with systemic reactions to *Hymenoptera* stings and increased serum tryptase levels (Bonadonna et al). 2009;123: 680-6

Milk hypersensitivity

Accidental allergic reactions in children allergic to cow's milk proteins (Boyano-Martínez et al). 2009;123:883-8

Adaptive regulatory T (Treg) cells are associated with tolerance to milk allergen (Leung and Szefler). 2009;123:41 (The editors' choice)

Allergen-specific basophil suppression associated with clinical tolerance in patients with milk allergy (Leung and Szefler). 2009;123:772 (The editors' choice)

Allergen-specific basophil suppression associated with clinical tolerance in patients with milk allergy (Wanich et al). 2009;123:789-94
Association of allergen-specific regulatory T cells with the onset of clinical tolerance to milk protein (Shreffler et al). 2009;123:43-52

Mites
A hypoallergenic variant of Der p 1 as a candidate for mite allergy vaccines (Walgraffe et al). 2009;123:1150-6
Allergen impersonator (Rothenberg and Nelson). 2009;123:734 (News beyond our pages)
Der p 1 suppresses indoleamine 2, 3-dioxygenase in dendritic cells from house dust mite–sensitive patients with asthma (Maneechotesuwan et al). 2009;123:239-48
House dust mite–derived β-glucans mediate chemokine secretion (Leung and Szefler). 2009;123:580 (The editors' choice)
Innate immune responses of airway epithelium to house dust mite are mediated through β-glucan–dependent pathways (Nathan et al). 2009;123:612-8

Mitogen-activated protein kinases
Mitogen-activated protein kinase/extracellular signal-regulated kinase 1/2–dependent pathways are essential for $CD8^+$ T cell–mediated airway hyperresponsiveness and inflammation (Ohnishi et al). 2009;123:249-58

Monoclonal antibodies; *see also* Omalizumab
A desensitization protocol for the mAb cetuximab (Jerath et al). 2009;123:260-2 (Letter to the editor)
Anti-CD20 or anti-IgE therapy for severe chronic autoimmune urticaria (Arkwright). 2009;123:510-1 (Correspondence)
Anti-CD20 or anti-IgE therapy for severe chronic autoimmune urticaria (Kaplan et al). 2009;123:511 (Letter reply)
Anti–IL-2 receptor monoclonal antibody prolongs time to severe asthma exacerbations (Rothenberg and Nelson). 2009;123:1-2 (News beyond our pages)
Anti–IL-5 (mepolizumab) therapy does not alter IL-5 receptor α levels in patients with eosinophilic esophagitis (Conus et al). 2009;123:269 (Correspondence)
Anti–IL-5 (mepolizumab) therapy does not alter IL-5 receptor α levels in patients with eosinophilic esophagitis (Rothenberg and Stein). 2009;123:269-70 (Letter reply)
Redefining the role of eosinophils in asthma (Rothenberg and Nelson). 2009;123:975-6 (News beyond our pages)
Treatment of *FIP1L1/PDGFRA*-negative hypereosinophilic syndrome with alemtuzumab, an anti-CD52 antibody (Wagner et al). 2009;123:1407-8 (Letter to the editor)
Trial of TNF-α blockade fails in patients with severe asthma (Rothenberg and Nelson). 2009;123:1198 (News beyond our pages)

Mortality
Anaphylaxis fatalities and admissions in Australia (Liew et al). 2009;123:434-42
The outer wall of small airways is a major site of remodeling in fatal asthma (Dolhnikoff et al). 2009;123:1090-7

Mucormycosis
Mucormycosis in chronic granulomatous disease: association with iatrogenic immunosuppression (Vinh et al). 2009;123:1411-3 (Letter to the editor)

Mutation
A Turkish family with a novel mutation in the promoter region of the C1 inhibitor gene (Büyüköztürk et al). 2009;123:962-4 (Letter to the editor)

N

Nasal polyposis
Prostaglandin E_2 suppresses staphylococcal enterotoxin–induced eosinophilia-associated cellular responses dominantly through an E-prostanoid 2–mediated pathway in nasal polyps (Okano et al). 2009;123:868-74

National Health and Nutrition Examination Survey 2005-2006
Association of obesity with IgE levels and allergy symptoms in children and adolescents: results from the National Health and Nutrition Examination Survey 2005-2006 (Visness et al). 2009;123:1163-9

Natural killer T-cells
Natural killer T cells in the lungs of patients with asthma (Matangkasombut et al). 2009;123:1181-5 (Letter to the editor)
Natural killer T (NKT) cells respond to IL-25 to cause airway hyperreactivity (Rothenberg and Nelson). 2009;123:278 (News beyond our pages)

Nematode infections
Eosinophils co-opted for parasite survival (Rothenberg and Nelson). 2009;123:733 (News beyond our pages)

Neutrophils
Selective and direct activation of human neutrophils but not eosinophils by Toll-like receptor 8 (Janke et al). 2009;123:1026-33
Toll-like receptor 8 in neutrophils: the danger of systemic toxicity (Leung and Szefler). 2009;123:1024 (The editors' choice)

Nitric oxide
Exhaled nitric oxide (eNO) and management of childhood asthma (Rothenberg and Nelson). 2009;123:975 (News beyond our pages)

Nitric oxide inhibits human rhinovirus-induced transcriptional activation of CXCL10 in airway epithelial cells (Koetzler et al). 2009;123:201-8

Notch1and Notch2 proteins
Mast cells as antigen-presenting cells (Leung and Szefler). 2009;123:42 (The editors' choice)
Notch signaling confers antigen-presenting cell functions on mast cells (Nakano et al). 2009;123:74-81

Nut hypersensitivity; *see also* Peanut hypersensitivity
Component-resolved *in vitro* diagnosis of hazelnut allergy in Europe (Hansen et al). 2009;123:1134-41

Nutrition; *see also* Breast-feeding
Diet and asthma in French women (Rothenberg and Nelson). 2009;123:733 (News beyond our pages)

Nutritional supplements; *see also* Herbal medicine
Probiotics for the treatment or prevention of eczema (Boyle et al). 2009;123:266-7 (Correspondence)
Probiotics for the treatment or prevention of eczema (Lee and Bielory). 2009;123:267 (Letter reply)
The good, the bad, the vitamin E (Rothenberg and Nelson). 2009;123:975 (News beyond our pages)

O

Obesity; *see also* Body mass index
Association of obesity with IgE levels and allergy symptoms in children and adolescents: results from the National Health and Nutrition Examination Survey 2005-2006 (Visness et al). 2009;123:1163-9
Asthma and obesity: an archival addendum (Cohen). 2009;123:265-6 (Correspondence)
Asthma and obesity: an archival addendum (Gold and Litonjua). 2009;123:266 (Letter reply)
Body mass index and asthma incidence in the Black Women's Health Study (Coogan et al). 2009;123:89-95
Comparison of anthropometric measures of obesity in childhood allergic asthmaCentral obesity is most relevant (Musaad et al). 2009;123:1321-7
In asthma, the apple falls faster than the pear (Tantisira). 2009;123:1075-6 (Editorial)
Lung function test results in normal infantsa COPSAC sequel (Yemen and Gaston). 2009;123:658-9 (Editorial)
The effect of obesity on asthma incidence: moving past the epidemiologic evidence (Clerisme-Beaty and Rand). 2009;123:96-7 (Editorial)

Occupational exposure
Advances in environmental and occupational disorders in 2008 (Bush and Peden). 2009;123:575-8
Agents causing occupational asthma (Malo and Chan-Yeung). 2009;123:545-50 (Current perspectives)
Associations between pre-employment immunologic and airway mucosal factors and the development of occupational allergy (Krop et al). 2009;123:694-700
Current perspectives in occupational asthma (Bush). 2009;123:567-8 (Editorial)
Management of work-related asthma (Smith and Bernstein). 2009;123:551-7 (Current perspectives)
Mechanisms of occupational asthma (Maestrelli et al). 2009;123:531-42
Occupational asthma: current concepts in pathogenesis, diagnosis, and management (Dykewicz). 2009;123:519-28
Respiratory sensitization of a worker to the warehouse beetle *Trogoderma variabile:* an index case (Bernstein et al). 2009;123:1413-6 (Letter to the editor)

Omalizumab
Advances in allergic skin disease: omalizumab is a promising therapy for urticaria and angioedema (Spector and Tan). 2009;123:273-4 (Correspondence)
Anti-IgE therapy: clinical utility beyond asthma (Casale and Stokes). 2009;123:770-1
Asthma symptom re-emergence after omalizumab withdrawal correlates well with increasing IgE and decreasing pharmacokinetic concentrations (Slavin et al). 2009;123:107-13
Pathogenicity of IgE in autoimmunity: successful treatment of bullous pemphigoid with omalizumab (Fairley et al). 2009;123:704-5 (Letter to the editor)
Therapeutic efficacy of omalizumab (MacGlashan). 2009;123:114-5 (Editorial)

Omenn syndrome
Novel presentation of Omenn syndrome in association with aniridia (Sheehan et al). 2009;123:966-9 (Letter to the editor)

Oral challenge; *see* Allergen challenge

Oral contraception
Oral contraception, body mass index, and asthma: a cross-sectional Nordic-Baltic population survey (Macsali et al). 2009;123:391-7

Oscillometry
Impulse oscillometry versus spirometry in a long-term study of controller therapy for pediatric asthma (Larsen et al). 2009;123:861-7

Oxidative stress
Airway glutathione homeostasis is altered in children with severe asthma: evidence for oxidant stress (Fitzpatrick et al). 2009;123:146-52

Ozone
Arginase I and II variants and asthma occurrence: differential modifying effects of atopy and ozone (Leung and Szefler). 2009;123:579 (The editors' choice)
Roles of arginase variants, atopy, and ozone in childhood asthma (Salam et al). 2009;123:596-602

P

P-selectin
Platelets play important roles in the late phase of the immediate hypersensitivity reaction (Tamagawa-Mineoka et al). 2009;123:581-7
Significant involvement of platelets in the late phase of immediate hypersensitivity reaction (Leung

and Szefler). 2009;123:579 (The editors' choice)

Parasites
Eosinophils co-opted for parasite survival (Rothenberg and Nelson). 2009;123:733 (News beyond our pages)

Parent-child relationships
Parental support and cytokine activity in childhood asthmathe role of glucocorticoid sensitivity (Miller et al). 2009;123:824-30

Patient compliance
Adolescents and asthma: Why bother with our meds? (Naimi et al). 2009;123:1335-41
Individualized asthma self-management improves medication adherence and markers of asthma control (Janson et al). 2009;123:840-6

Peanut hypersensitivity
Allergenicity and antigenicity of fenugreek *(Trigonella foenum-graecum)* proteins in foods (Kruse Fæste et al). 2009;123:187-94
Characteristics of childhood peanut allergy in the Australian Capital Territory, 1995 to 2007 (Mullins et al). 2009;123:689-93
Early peanut consumption: postpone or promote? (Burks). 2009;123:424-5 (Editorial)
Food Allergy Herbal Formula-2 silences peanut-induced anaphylaxis for a prolonged posttreatment period via IFN-γ–producing $CD8^+$ T cells (Srivastava et al). 2009;123:443-51
Household peanut consumption as a risk factor for the development of peanut allergy (Fox et al). 2009;123:417-23
Is the prevalence of peanut allergy increasing? 5-year follow-up study in children in Montreal (Ben-Shoshan et al). 2009;123:783-8
No increase in the prevalence of peanut allergy (Leung and Szefler). 2009;123:772 (The editors' choice)
Peanuts can contribute to anaphylactic shock by activating complement (Khodoun et al). 2009;123:342-51
The perfectly potent peanut (Shreffler). 2009;123:352-3 (Editorial)
Why are peanuts so allergenic? (Leung and Szefler). 2009;123:334 (The editors' choice)

Pediatric patients; *see* Asthma, pediatric

Pemphigus
Pathogenicity of IgE in autoimmunity: successful treatment of bullous pemphigoid with omalizumab (Fairley et al). 2009;123:704-5 (Letter to the editor)

Pepys, Jack
Jack Pepys (May 15, 1914–September 9, 1996)a personal recollection (Pepys). 2009;123:718-20 (The allergy archives)
Jack Pepys' contributions to the medical literature (Nelson). 2009;123:720-3 (The allergy archives)

Pets; *see* Animals, domestic

Pharmacogenetics
Repeatability of response to asthma medications (Wu et al). 2009;123:385-90

Pharmacokinetics
Levalbuterol kinetics (Lipworth and Clearie). 2009;123:275 (Correspondence)

Phosphatidylinositols
Allergic airway hyperresponsiveness, inflammation, and remodeling do not develop in phosphoinositide 3-kinase γ–deficient mice (Takeda et al). 2009;123:805-12
PI3Kγ as a new therapeutic target for asthma (Leung and Szefler). 2009;123:773 (The editors' choice)

Pimecrolimus
Different effects of pimecrolimus and betamethasone on the skin barrier in patients with atopic dermatitis (Jensen et al). 2009;123:1124-33

Platelets
Platelets play important roles in the late phase of the immediate hypersensitivity reaction (Tamagawa-Mineoka et al). 2009;123:581-7
Significant involvement of platelets in the late phase of immediate hypersensitivity reaction (Leung and Szefler). 2009;123:579 (The editors' choice)

***PLAUR* gene**
PLAUR polymorphisms are associated with asthma, PLAUR levels, and lung function decline (Barton et al). 2009;123:1391-400

Pliny the Elder
Asthma and obesity: an archival addendum (Cohen). 2009;123:265-6 (Correspondence)
Asthma and obesity: an archival addendum (Gold and Litonjua). 2009;123:266 (Letter reply)

Pneumococcal vaccines
Antibody response to pneumococcal vaccination as a function of preimmunization titer (Hare et al). 2009;123:195-200
Opsonic function of bronchoalveolar lavage IgG after pneumococcal vaccination in HIV-infected and uninfected adults (Tam et al). 2009;123:1420-1 (Correspondence)

Pollen allergy; *see also* Grass pollen
High-titer IgE antibody specific for pollen allergens in northern California is associated with both wheezing and total serum IgE (Erwin et al). 2009;123:706-8 (Letter to the editor)

Polymorphism
CD14 and *IL4R* gene polymorphisms modify the effect of day-care attendance on serum IgE levels (Suzuki et al). 2009;123:1408-11 (Letter to the editor)
Functional gene variants in T_H1 transcription factors influence asthma risk (Leung and Szefler). 2009;123:1025 (The editors' choice)
Gene variants of *IL13*, *IL4*, and *IL4RA* are predictors of β-lactam allergy (Guéant et al). 2009;123:509 (Correspondence)
Gene variants of *IL13*, *IL4*, and *IL4RA* are predictors of β-lactam allergy (Apter et al). 2009;123:509-10 (Letter reply)

Genetic variants in the *GATA3* gene are not associated with asthma and atopic diseases in German children (Suttner et al). 2009;123:1179-81 (Letter to the editor)
HLX1 gene variants influence the development of childhood asthma (Leung and Szefler). 2009;123:42 (The editors' choice)
HLX1 gene variants influence the development of childhood asthma (Suttner et al). 2009;123:82-8
Meta-analysis of filaggrin polymorphisms in eczema and asthma: robust risk factors in atopic disease (Rodriquez et al). 2009;123:1361-70
PLAUR polymorphisms are associated with asthma, PLAUR levels, and lung function decline (Barton et al). 2009;123:1391-400
TBX21 gene variants increase childhood asthma risk in combination with *HLX1* variants (Suttner et al). 2009;123:1062-8

Pregnancy; *see also* Cesarean section
Mothers' anxiety during pregnancy is associated with asthma in their children (Cookson et al). 2009;123:847-53
Update on allergies in pregnancy, lactation, and early childhood (Palí-Schöll et al). 2009;123:1012-21 (Current perspectives)

Prenatal exposure; *see* Immunity, maternally-acquired; Pregnancy

Probiotics
Less allergy at age 5 years in cesarean-born children receiving probiotics (Leung and Szefler). 2009;123:333 (The editors' choice)
Prenatal probiotic administration can influence *Bifidobacterium* microbiota development in infants at high risk of allergy (Lahtinen et al). 2009;123:499-501 (Letter to the editor)
Probiotics for the treatment or prevention of eczema (Boyle et al). 2009;123:266-7 (Correspondence)
Probiotics for the treatment or prevention of eczema (Lee and Bielory). 2009;123:267 (Letter reply)
Probiotics prevent IgE-associated allergy until age 5 years in cesarean-delivered children but not in the total cohort (Kuitunen et al). 2009;123:335-41

Prostaglandins
Prostaglandin E receptor subtype EP3 in conjunctival epithelium regulates late-phase reaction of experimental allergic conjunctivitis (Ueta et al). 2009;123:466-71
Prostaglandin E_2 suppresses staphylococcal enterotoxin–induced eosinophilia-associated cellular responses dominantly through an E-prostanoid 2–mediated pathway in nasal polyps (Okano et al). 2009;123:868-74

Pruritus
Histamine 4 receptor, IL-31, and pruritus—new links discovered? (Leung and Szefler). 2009;123:580 (The editors' choice)

Q

Quality of life
Antifungal therapy in severe asthma (Rothenberg and Nelson). 2009;123:517 (News beyond our pages)
Evolution of patients with nonallergic rhinitis supports conversion to allergic rhinitis (Rondón et al). 2009;123:1098-102

R

Racial disparities
Addressing asthma health disparities: a multilevel challenge (Canino et al). 2009;123:1209-17
Advances in adult asthma diagnosis and treatment and health outcomes, education, delivery, and quality in 2008 (Apter). 2009;123:35-40
Asthma disparities in urban environments (Bryant-Stephens). 2009;123:1199-206

RCAN1 protein
Turning mast cells on and off (Rothenberg and Nelson). 2009;123:733 (News beyond our pages)

Receptors, chemokine
CCR4 leads the way for T_H2 cell homing into the allergic lung (Leung and Szefler). 2009;123:42 (The editors' choice)

Receptors, glucocorticoid
The glucocorticoid receptor heterocomplex gene *STIP1* is associated with improved lung function in asthmatic subjects treated with inhaled corticosteroids (Hawkins et al). 2009;123:1376-83

Receptors, histamine
Histamine 4 receptor, IL-31, and pruritus—new links discovered? (Leung and Szefler). 2009;123:580 (The editors' choice)
The histamine H_4 receptor is functionally expressed on T_H2 cells (Gutzmer et al). 2009;123:619-25

Receptors, interleukin
Anti–IL-2 receptor monoclonal antibody prolongs time to severe asthma exacerbations (Rothenberg and Nelson). 2009;123:1-2 (News beyond our pages)

Receptors, leukotriene
New member of the leukotriene receptor family (Rothenberg and Nelson). 2009;123:1 (News beyond our pages)

Respiratory syncytial virus
Respiratory syncytial virus: back to basics (Glezen). 2009;123:404-5 (Editorial)
Respiratory syncytial virus neutralizing antibodies in cord blood, respiratory syncytial virus hospitalization, and recurrent wheeze (Stensballe et al). 2009;123:398-403
The causal direction in the association between respiratory syncytial virus hospitalization and asthma (Stensballe et al). 2009;123:131-7
Virus-specific IgE enhances airway responsiveness on reinfection with respiratory syncytial virus in newborn mice (Dakhama et al). 2009;123:138-45

Respiratory tract infections
Learning from molecular sleuths (Gern and Busse). 2009;123:105-6 (Editorial)
Rhinitis
Change in visual analog scale score in a pragmatic randomized cluster trial of allergic rhinitis (Bousquet et al). 2009;123:1349-54
Comparison of anthropometric measures of obesity in childhood allergic asthma: Central obesity is most relevant (Musaad et al). 2009;123:1321-7
Evolution of patients with nonallergic rhinitis supports conversion to allergic rhinitis (Rondón et al). 2009;123:1098-102
Is structured allergy history sufficient when assessing patients with asthma and rhinitis in general practice? (Smith et al). 2009;123:646-50
Multiallergen immunotherapy for allergic rhinitis and asthma (Nelson). 2009;123:763-9 (Rostrum)
Quantitative assessment of allergic shiners in children with allergic rhinitis (Chen et al). 2009;123:665-71
Rhinoconjunctivitis
Efficacy and safety of 5-grass-pollen sublingual immunotherapy tablets in pediatric allergic rhinoconjunctivitis (Wahn et al). 2009;123:160-6
Fluticasone furoate nasal spray reduces the nasal-ocular reflexa mechanism for the efficacy of topical steroids in controlling allergic eye symptoms (Baroody et al). 2009;123:1342-8
Safety and efficacy in children of an SQ-standardized grass allergen tablet for sublingual immunotherapy (Bufe et al). 2009;123:167-73
Rhinovirus
A novel group of rhinoviruses is associated with asthma hospitalizations (Miller et al). 2009;123:98-104
All rhinoviruses sequenced (Rothenberg and Nelson). 2009;123:975 (News beyond our pages)
Greater *in vitro* susceptibility to rhinovirus infection of bronchial than nasal airway epithelial cells from human subjects (Lopez-Souza et al). 2009;123:1384-90
Learning from molecular sleuths (Gern and Busse). 2009;123:105-6 (Editorial)
Nitric oxide inhibits human rhinovirus-induced transcriptional activation of CXCL10 in airway epithelial cells (Koetzler et al). 2009;123:201-8
Rural health
Rural health disparities in asthma care and outcomes (Valet et al). 2009;123:1220-5 (Current perspectives)

S

Self-management
Individualized asthma self-management improves medication adherence and markers of asthma control (Janson et al). 2009;123:840-6
Sensitization
Adiposity, serum lipid levels, and allergic sensitization in Chinese men and women (Ouyang et al). 2009;123:940-8
Advances in environmental and occupational disorders in 2008 (Bush and Peden). 2009;123:575-8
Allergen impersonator (Rothenberg and Nelson). 2009;123:734 (News beyond our pages)
Associations between pre-employment immunologic and airway mucosal factors and the development of occupational allergy (Krop et al). 2009;123:694-700
Determinants of allergenicity (Traidl-Hoffmann et al). 2009;123:558-66 (Current perspectives)
Disparities in allergic disease: hypersensitivity and social disorders (Cohen). 2009;123:1422-4 (The allergy archives)
Early peanut consumptionpostpone or promote? (Burks). 2009;123:424-5 (Editorial)
Household peanut consumption as a risk factor for the development of peanut allergy (Fox et al). 2009;123:417-23
Intrauterine bacterial growth at birth and risk of asthma and allergic sensitization among offspring at the age of 15 to 17 years (Keski-Nisula et al). 2009;123:1305-11
Maternal prenatal allergen exposure and immune response influence cord blood IgE (Leung and Szefler). 2009;123:1024 (The editors' choice)
Mediator release assay for assessment of biological potency of German cockroach allergen extracts (Nowak-Wegrzyn et al). 2009;123:949-55
Relationships among prenatal aeroallergen exposure and maternal and cord blood IgE: project ACCESS (Peters et al). 2009;123:1041-6
Specific allergic sensitization in parents and their 18-yearold offspring in the Suburban Detroit Childhood Allergy Study. 2009;123:1401-6
The perfectly potent peanut (Shreffler). 2009;123:352-3 (Editorial)
Toll-like receptor 2 is important for the T_H1 response to cutaneous sensitization (Jin et al). 2009;123:875-82
Sex factors
The effect of sex on asthma control from the National Asthma Survey (Temprano and Mannino). 2009;123:854-60
Skin diseases
Advances in allergic skin disease, anaphylaxis, and hypersensitivity reactions to foods, drugs, and insects in 2008 (Sicherer and Leung). 2009;123:319-27
Skin tests
Frequency and clinical implications of skin autoreactivity to serum versus plasma in patients with chronic urticaria (Metz et al). 2009;123:705-6 (Letter to the editor)

Is the autologous plasma skin test in patients with chronic urticaria really useless? (Asero et al). 2009;123:1417 (Correspondence)
Is the autologous plasma skin test in patients with chronic urticaria really useless? (Metz et al). 2009;123:1417-8 (Letter reply)
Is the prevalence of peanut allergy increasing? 5-year follow-up study in children in Montreal (Ben-Shoshan et al). 2009;123:783-8

Smoking
Prenatal determinants of neonatal lung function in high-risk newborns (Bisgaard et al). 2009;123:651-7

Smooth-muscle cells
Airway smooth muscle hyperplasia in asthma—a consequence of fibrocyte recruitment? (Leung and Szefler). 2009;123:334 (The editors' choice)
Fibrocyte localization to the airway smooth muscle is a feature of asthma (Saunders et al). 2009;123:376-84
Impaired translation of CCAAT/enhancer binding protein α mRNA in bronchial smooth muscle cells of asthmatic patients (Borger et al). 2009;123:639-45
Thymic stromal lymphopoietin as a mediator of crosstalk between bronchial smooth muscles and mast cells (Allakhverdi et al). 2009;123:958-60 (Letter to the editor)

Social/community factors
The protective effect of community factors on childhood asthma (Gupta et al). 2009;123:1297-304

Soybeans
Soybean *(Glycine max)* allergy in Europe: Gly m 5 (β-conglycinin) and Gly m 6 (glycinin) are potential diagnostic markers for severe allergic reactions to soy (Holzhauser et al). 2009;123:452-8

Spirometry
Impulse oscillometry versus spirometry in a long-term study of controller therapy for pediatric asthma (Larsen et al). 2009;123:861-7

Sports
The acute effect of swimming on airway inflammation in adolescent elite swimmers (Pedersen et al). 2009;123:502-4 (Letter to the editor)

Staphylococcus aureus
Impairing oral tolerance promotes allergy and anaphylaxisa new murine food allergy model (Ganeshan et al). 2009;123:231-8

START study
The Inhaled Steroid Treatment As Regular Therapy in Early Asthma (START) follow-up study does not support early and daily treatment (Gereda and Baena-Cagnani). 2009;123:710 (Correspondence)
The Inhaled Steroid Treatment As Regular Therapy in Early Asthma (START) follow-up study does not support early and daily treatment (Busse). 2009;123:710-1 (Letter reply)

STAT transcription factors
A novel mutation in the linker domain of the signal transducer and activator of transcription 3 gene, p.Lys531Glu, in hyper-IgE syndrome (Kim et al). 2009;123:956-8 (Letter to the editor)
Signal transducer and activator of transcription 5 tyrosine phosphorylation for the diagnosis and monitoring of patients with severe combined immunodeficiency (Walshe et al). 2009;123:505-8 (Letter to the editor)

Stings; *see Hymenoptera;* Insect bites and stings

Stress, psychological
Mothers' anxiety during pregnancy is associated with asthma in their children (Cookson et al). 2009;123:847-53
Parental support and cytokine activity in childhood asthma: the role of glucocorticoid sensitivity (Miller et al). 2009;123:824-30
Stress and acquired glucocorticoid resistance: a relationship hanging in the balance (Wright). 2009;123:831-2 (Editorial)

Superantigens
IL-17 in atopic eczema: linking allergen-specific adaptive and microbial-triggered innate immune response (Eyerich et al). 2009;123:59-66

T

T lymphocyte subsets; *see also* T lymphocytes, regulatory; T_H17 lymphocytes
CCR4 leads the way for T_H2 cell homing into the allergic lung (Leung and Szefler). 2009;123:42 (The editors' choice)
Chameleon T_H2 cells (Rothenberg and Nelson). 2009;123:1197 (News beyond our pages)
Contribution of CCR4 and CCR8 to antigen-specific T_H2 cell trafficking in allergic pulmonary inflammation (Mikhak et al). 2009;123:67-73
Does the T_H1/ T_H2 paradigm fit for human T cells? (Leung and Szefler). 2009;123:773 (The editors' choice)
IL-33, dendritic cells, and an atypical T_H2 response (Leung and Szefler). 2009;123:1025 (The editors' choice)
IL-22–producing "T22" T cells account for upregulated Il-22 in atopic dermatitis despite reduced IL-17–producing T_H17 T cells (Nograles et al). 2009;123:1244-52
Increased IL-22 levels, independent of T_H17 cells, in patients with chronic atopic dermatitis (Leung and Szefler). 2009;123:1242 (The editors' choice)
T-box 21 transcription factor is responsible for distorted T_H2 differentiation in human peripheral $CD4^+$ T cells (Kaminuma et al). 2009;123:813-23
T cells in health and disease (Akdis). 2009;123:1022-3 (Editorial)
The histamine H_4 receptor is functionally expressed on T_H2 cells (Gutzmer et al). 2009;123:619-25

Toll-like receptor 2 is important for the T_H1 response to cutaneous sensitization (Jin et al). 2009;123: 875-82

T lymphocytes

Restoration of T-box–containing protein expressed in T cells protects against allergen-induced asthma (Park et al). 2009;123:479-85

Serum cytotoxic T lymphocyte–associated antigen 4 in *Hymenoptera* venom allergy and its modulation by specific immunotherapy (Saverino et al). 2009;123:258-60 (Letter to the editor)

Switch-hitting T cells (Rothenberg and Nelson). 2009;123:2 (News beyond our pages)

Transplacental tolerance (Rothenberg and Nelson). 2009;123:518 (News beyond our pages)

T lymphocytes, regulatory

Adaptive regulatory T (Treg) cells are associated with tolerance to milk allergen (Leung and Szefler). 2009;123:41 (The editors' choice)

Antigen-primed splenic $CD8^+$ T cells impede the development of oral antigen–induced allergic diarrhea (Yamada et al). 2009;123: 889-94

Association of allergen-specific regulatory T cells with the onset of clinical tolerance to milk protein (Shreffler et al). 2009;123:43-52

$CD4^+CD25^+$ regulatory T cells suppress contact hypersensitivity reactions through a CD39, adenosine-dependent mechanism (Ring et al). 2009;123:1287-96

IL-2– and CD25-dependent immunoregulatory mechanisms in the homeostasis of T-cell subsets (Létourneau et al). 2009;123:758-62 (Current perspectives)

Maternal farm exposure modulates neonatal immune mechanisms through regulatory T cells (Schaub et al). 2009;123:774-82

Mechanisms and treatment of allergic disease in the big picture of regulatory T cells (Akdis and Akdis). 2009;123:735-46

Regulation of T_H17 cells in the mucosal surfaces (Mucida and Salek-Ardakani). 2009;123:997-1003 (Current perspectives)

Regulatory T cells suppress skin inflammation by adenosine production (Leung and Szefler). 2009;123:1243 (The editors' choice)

Regulatory T cells turn the table on T_H2 response (Rothenberg and Nelson). 2009;123:1198 (News beyond our pages)

Selective deregulation in chemokine signaling pathways of $CD4^+CD25^{hi}CD127^{lo/-}$ regulatory T cells in human allergic asthma (Nguyen et al). 2009;123:933-9

T cells in health and disease (Akdis). 2009;123:1022-3 (Editorial)

T_H17 cells and regulatory T cells in primary immunodeficiency diseases (Ochs et al). 2009;123: 977-83

Therapeutic approaches to allergy and autoimmunity based on the $FoxP3^+$ regulatory T-cell activation and expansion (Miyara et al). 2009;123:749-55

Tachyphylaxis

Contribution of histamine metabolism to tachyphylaxis during the buildup phase of rush immunotherapy (Maintz et al). 2009;123:701-3 (Letter to the editor)

Tea, green

Preclinical development of the green tea catechin, epigallocatechin gallate, as an HIV-1 therapy (Nance et al). 2009;123:459-65

Television

Television allergy (Rothenberg and Nelson). 2009;123:1198 (News beyond our pages)

T_H17 lymphocytes

Development and function of T_H17 cells in health and disease (Louten et al). 2009;123:1004-11 (Current perspectives)

Differentiation and functional analysis of human T_H17 cells (Burgler et al). 2009;123:588-95

Functional definition of the T_H17 phenotype (Leung and Szefler). 2009;123:579 (The editors' choice)

IL-17–producing T cells in lung immunity and inflammation (Nembrini and Kopf). 2009;123: 986-94

Regulation of T_H17 cells in the mucosal surfaces (Mucida and Salek-Ardakani). 2009;123:997-1003 (Current perspectives)

Role of IL-7 in the regulation of T-cell homeostasis in partial DiGeorge syndrome (Tantibhaedhyangkul et al). 2009;123:960-2 (Letter to the editor)

T_H17-associated cytokines (IL-17A and IL-17F) in severe asthma (Al-Ramli et al). 2009;123:1185-7 (Letter to the editor)

Thrombomodulin

Allergen-enhanced thrombomodulin (blood dendritic cell antigen 3, CD141) expression on dendritic cells is associated with a T_H2-skewed immune response (Yerkovich et al). 2009;123:209-16

Thrombomodulin: a novel player in allergic asthma (Bratke et al). 2009;123:1192 (Correspondence)

Thrombomodulin: a novel player in allergic asthma (Yerkovich and Upham). 2009;123:1192-3 (Letter reply)

Thymic stromal lymphopoietin

Cytokine milieu modulates release of thymic stromal lymphopoietin from human keratinocytes stimulated with double-stranded RNA (Kinoshita et al). 2009;123:179-86

Thymic stromal lymphopoietin as a mediator of crosstalk between bronchial smooth muscles and mast cells (Allakhverdi et al). 2009;123:958-60 (Letter to the editor)

Thyroiditis, autoimmune

A survey of allergists regarding the association of thyroid autoimmunity with chronic urticaria

(Sheikh et al). 2009;123:1173-5 (Letter to the editor)

Tolerance; *see* Immune tolerance

Toll-like receptors

Selective and direct activation of human neutrophils but not eosinophils by Toll-like receptor 8 (Janke et al). 2009;123:1026-33

Toll-like receptor 3 enhances late-phase reaction of experimental allergic conjunctivitis (Ueta et al). 2009;123:1187-9 (Letter to the editor)

Toll-like receptor 8 in neutrophils: the danger of systemic toxicity (Leung and Szefler). 2009;123:1024 (The editors' choice)

Toll-like receptor 2 is important for the T_H1 response to cutaneous sensitization (Jin et al). 2009;123:875-82

Toll-like receptor 4 variants reduce airway response at high endotoxin levels (Leung and Szefler). 2009;123:1024 (The editors' choice)

Toll-like receptor 4 variants reduce airway response in human subjects at high endotoxin levels in a swine facility (Senthilselvan et al). 2009;123:1034-40

Toll-like receptor 7–induced naive human B-cell differentiation and immunoglobulin production (Glaum et al). 2009;123:224-30

Transmembrane activator, calcium modulator, and cyclophilin ligand interactor plays and important role in plasma cell differentiation of B cells (Leung and Szefler). 2009;123:1243 (The editors' choice)

TRACK questionnaire

Test for Respiratory and Asthma Control in Kids (TRACK)a caregiver-completed questionnaire for preschool-aged children (Murphy et al). 2009;123:833-9

Transcription factors

Differentiation and functional analysis of human T_H17 cells (Burgler et al). 2009;123:588-95

Functional definition of the T_H17 phenotype (Leung and Szefler). 2009;123:579 (The editors' choice)

Functional gene variants in T_H1 transcription factors influence asthma risk (Leung and Szefler). 2009;123:1025 (The editors' choice)

T-box 21 transcription factor is responsible for distorted T_H2 differentiation in human peripheral $CD4^+$ T cells (Kaminuma et al). 2009;123:813-23

TBX21 gene variants increase childhood asthma risk in combination with *HLX1* variants (Suttner et al). 2009;123:1062-8

Transforming growth factors

Mechanisms and treatment of allergic disease in the big picture of regulatory T cells (Akdis and Akdis). 2009;123:735-46

Transmembrane Activator and CAML Interactor Protein

Transmembrane activator, calcium modulator, and cyclophilin ligand interactor drives plasma cell differentiation in LPS-activated B cells (Ozcan et al). 2009;123:1277-86

Transmembrane activator, calcium modulator, and cyclophilin ligand interactor plays and important role in plasma cell differentiation of B cells (Leung and Szefler). 2009;123:1243 (The editors' choice)

Treg cells; *see* T lymphocytes, regulatory

Trogoderma variabile

Respiratory sensitization of a worker to the warehouse beetle *Trogoderma variabile:* an index case (Bernstein et al). 2009;123:1413-6 (Letter to the editor)

Tumor necrosis factor

Trial of TNF-α blockade fails in patients with severe asthma (Rothenberg and Nelson). 2009;123:1198 (News beyond our pages)

U

Ultraviolet rays

UV-B radiation induces the expression of antimicrobial peptides in human keratinocytes *in vitro* and *in vivo* (Gläser et al). 2009;123:1117-23

Urban health

Addressing asthma health disparitiesa multilevel challenge (Canino et al). 2009;123:1209-17

Asthma disparities in urban environments (Bryant-Stephens). 2009;123:1199-206

Urticaria

A survey of allergists regarding the association of thyroid autoimmunity with chronic urticaria (Sheikh et al). 2009;123:1173-5 (Letter to the editor)

Activation of the blood coagulation cascade is involved in patients with chronic urticaria (Wang et al). 2009;123:972-3 (Correspondence)

Activation of the blood coagulation cascade is involved in patients with chronic urticaria (Asero et al). 2009;123:973-4 (Letter reply)

Advances in allergic skin disease: omalizumab is a promising therapy for urticaria and angioedema (Spector and Tan). 2009;123:273-4 (Correspondence)

Anti-CD20 or anti-IgE therapy for severe chronic autoimmune urticaria (Arkwright). 2009;123:510-1 (Correspondence)

Anti-CD20 or anti-IgE therapy for severe chronic autoimmune urticaria (Kaplan et al). 2009;123:511 (Letter reply)

Clinical course and urinary eicosanoids in patients with aspirin-induced urticaria followed up for 4 years (Setkowicz et al). 2009;123:174-8

Frequency and clinical implications of skin autoreactivity to serum versus plasma in patients with chronic urticaria (Metz et al). 2009;123:705-6 (Letter to the editor)

High-dose desloratadine decreases wheal volume and improves cold provocation thresholds compared with standard-dose treatment in patients with acquired cold urticariaa randomized,

placebo-controlled, crossover study (Siebenhaar et al). 2009;123:672-9
Is the autologous plasma skin test in patients with chronic urticaria really useless? (Asero et al). 2009;123:1417 (Correspondence)
Is the autologous plasma skin test in patients with chronic urticaria really useless? (Metz et al). 2009;123:1417-8 (Letter reply)
Low-dose cyclosporine is a good option for severe chronic urticaria (Kessel and Toubi). 2009;123:970 (Correspondence)
Low-dose cyclosporine is a good option for severe chronic urticaria (Kaplan). 2009;123:970-1 (Letter reply)
Successful treatment of chronic drug-resistant urticaria with alprazolam (Dueñas-Laita et al). 2009;123:504-5 (Letter to the editor)
What the first 10,000 patients with chronic urticaria have taught me: a personal journey (Kaplan). 2009;123:713-6 (Clinical pearls)

V

Vascular endothelial growth factors
Vascular endothelial growth factors synthesized by human lung mast cells exert angiogenic effects (Detoraki et al). 2009;123:1142-9
Vascular permeability
New member of the leukotriene receptor family (Rothenberg and Nelson). 2009;123:1 (News beyond our pages)
Vasculitis
Update on vasculitis (Khasnis and Langford). 2009;123:1226-36 (Current perspectives)
Venom allergy; *see Hymenoptera;* Insect bites and stings
Venom immunotherapy
Serum cytotoxic T lymphocyte–associated antigen 4 in *Hymenoptera* venom allergy and its modulation by specific immunotherapy (Saverino et al). 2009;123:258-60 (Letter to the editor)
Sublingual immunotherapy with venom is not recommended for patients with *Hymenoptera* venom allergy (Ruëff et al). 2009;123:272-3 (Correspondence)
Sublingual immunotherapy with venom is not recommended for patients with *Hymenoptera* venom allergy (Passalacqua). 2009;123:273 (Letter reply)
Venom immunotherapy reduces large local reactions to insect stings (Golden et al). 2009;123:1371-5
Virus diseases; *see also* HIV infections
Evidence that viral infections in infancy cause childhood asthma (Rothenberg and Nelson). 2009;123:278 (News beyond our pages)
Vitamin C
Vitamin C and exercise-induced bronchoconstriction in athletes (Hemilä). 2009;123:274-5 (Correspondence)
Vitamin E
The good, the bad, the vitamin E (Rothenberg and Nelson). 2009;123:975 (News beyond our pages)
Vitamins; *see also* Folic acid
Complementary and alternative medicine: herbs, phytochemicals and vitamins and their immunologic effects (Mainardi). 2009;123:283-94

W

Warts
Clinical and genetic diagnosis of warts, hypogammaglobulinemia, infections, and myelokathexis syndrome in 10 patients (Tassone et al). 2009;123:1170-3 (Letter to the editor)
Wheezing
A novel group of rhinoviruses is associated with asthma hospitalizations (Miller et al). 2009;123:98-104
High-titer IgE antibody specific for pollen allergens in northern California is associated with both wheezing and total serum IgE (Erwin et al). 2009;123:706-8 (Letter to the editor)
Higher serum folate levels are associated with a lower risk of atopy and wheeze (Matsui and Matsui). 2009;123:1253-9
Respiratory syncytial virus neutralizing antibodies in cord blood, respiratory syncytial virus hospitalization, and recurrent wheeze (Stensballe et al). 2009;123:398-403
